Architecture and Violence Bechir Kenzari, 2011 In today s turbulent times few subjects deserve a closer scrutiny than the interactions between violence and constructed environment Modernity s contradictory histories laid bare the fact that it is impossible to consider architecture simply a benign passive victim of humanity s violent vices Built space is as capable of incarnating violent acts as enacting them disciplining and silencing the subject in the process In this compelling volume some of the most incisive thinkers of contemporary architectural theory make manifest the intricacies of interrelations between architecture and violent events Employing a wide variety of perspectives and methodical approaches the authors examine some of the most dramatic and unexpected instances of these vexing relations Back cover

Urban Energy Systems James Keirstead, Nilay Shah, 2013 This book analyses the technical and social systems that satisfy these needs and asks how methods can be put into practice to achieve this

The Moving Metropolis Oliver Green, 2001

Railway George Revill, 2013-06-01 In the nineteenth century railways were viewed as a symbol of progress and confidence in technological modernity In the twenty first century the frustrations of gridlocked traffic record high gas prices and the looming fears of climate change have transformed the railway system once again into a symbol of hope that provides the possibility of an environmentally sustainable future In Railway George Revill examines the technology and politics of railway history as well as related themes such as mobility identity design marketing and sustainability In both practical and symbolic senses the cultural meanings of railways continue to play a role in how people organize and respond to modern environments social problems and technologies Revill draws from art literature music and film to illustrate how the railway carries meaning for all of us creating connections and separations detachment and involvement from the routine commuter

to the enthusiast As Revill shows railways inform our everyday language from fast track to side track to going off the rails and continue to fascinate us today In this wide ranging and well illustrated look at railways across the globe Revill ultimately reveals how central they are to our understanding of modern everyday life

Global Developments in Public Infrastructure Procurement Darrin Grimsey, Mervyn K. Lewis, 2017-11-24 There is widespread acceptance of the

importance of infrastructure but less agreement about how it should be funded and procured While most public infrastructure is still provided in house or by traditional procurement methods with well researched strengths and weaknesses the development of service concession arrangements has seen a greater emphasis on lifecycle costing risk assessment and asset design as featured in a variety of public private partnership PPP delivery models This book examines the various procurement approaches and provides a framework for comparing their advantages and disadvantages Drawing on international experience it considers some of the best and worst examples of PPPs and infrastructure projects generally along with the lessons for improving infrastructure procurement processes

The City and the Railway in the World from the Nineteenth Century to the Present Ralf Roth, Paul Van Heesvelde, 2022-07-18 This volume explores the relationship between cities and railways over three centuries Despite their nearly 200 year existence The City and the Railway in the World shows that urban railways are still politically and historically

important to the modern world Since its inception cities have played a significant role in the railway system cities were among the main reasons for building such efficient but lavish and costly modes of transport for persons goods and information They also influenced the technological appearance of railways as these have had to meet particular demands for transport in urban areas In 25 essays this volume demonstrates that the relationship between the city and the railway is one of the most publicly debated themes in the context of daily lives in growing urban settings as well as in the second urbanisation of the global South with migration from rural to urban landscapes The volume s broad geographical range includes discussions of railway networks railway stations and urban rails in countries such as India Japan England Belgium Romania Nigeria the USA and Mexico *The City and the Railway in the World* will be a useful tool for scholars interested in the history of transport travel and urban change **Victorian Studies** Philip Appleman,1957 Vols 1 include Victorian bibliography prepared by a committee of the Victorian Literature Group v 19 by a committee of the Victorian Division of the Modern Language Association of America formerly published in *Modern philology* **Nineteenth Century Literature Criticism** Kathy D. Clout,1991 **The railroad and the space program** Bruce Mazlish,1965 **The Politics of Crime and Conflict** Ted Robert Gurr,Peter N. Grabosky,Richard C. Hula,1977 *The Politics of Crime and Conflict* is a significant contribution to the comparative study of criminal justice Its strengths lie in the authors rigorous scholarly analysis and attention to detail the utility of the conceptual framework as an ordering device for the case studies the often fresh and insightful conclusions the authors draw from their analysis of the diverse body of data they present and the valuable heuristic contribution of Prof Gurr s theoretical model of urban disorder Finally the study is well written and remarkably free from jargon *Policy Studies Journal* Vol 6 No 3 Spring 1978 one can only praise and applaud these authors efforts to raise the study of urban crime and repression from **The Journal of Transport History** ,1991 *Metropolis; a Select Bibliography* International Union of Local Authorities,1967 **Metropolis Now!** Ramesh Kumar Biswas,2000 This critical interdisciplinary look at life in metropolitan centers portrays seventeen cities on four different continents Contributors analyze both their economic and social realities as well as their identity recent history and immediate future and the radical transformation in their physical forms
