Intrapreneurship Management Rainer Hasenauer, Oliver Yu, 2024-06-17 Develop and deploy industry-leading ideas with this groundbreaking management toolkit. The universal, modern image of an innovator is a technological entrepreneur who conceives and develops their groundbreaking ideas outside an existing institution and only subsequently builds infrastructure around it. In reality, however, the bulk of technological innovation comes through Intrapreneurship innovation that takes place inside an existing organization, taking advantage of the institutional support and economies of scale provided by continuing enterprises. Intrapreneurship Management is an approach that cultivates these internal innovations and the knowledge workers who produce them. It also provides access and tools for using Intrapreneurship READINESS Navigator (IRN), a unique software already deployed successfully in over 150 innovation projects. Psychopharmacology Handbook for the Non Medically Trained Sophia Dziegielewski, 2006-08-08 In today's era of managed behavioral health care mental health professionals are called upon to consult on medication treatment or recommend what medications would best serve as adjuncts to therapy. Medically trained or not, all mental health professionals need to know as much as possible about psychopharmacologic medications from dosage and side effects to drug-drug interactions and other special considerations in order to provide effective and accountable treatment. The first ever handbook of its kind, Psychopharmacology Handbook for the Non Medically Trained fills a noticeable gap in most student training programs by providing a reader-friendly and accessible overview of the role of drugs in mental health treatment. Emphasizing the importance of making medications available to consumers in conjunction with the most effective and efficient counseling interventions, Dziegielewski establishes the context for the therapeutic use of psychotropic drugs in the culture of today's mental health treatments, examines the danger of the quick-fix mentality into which consumers and clinicians are tempted to fall, and then focuses on the medications themselves. One of the most prominent and authoritative social work academics today, Dziegielewski is an authority on the topic of psychopharmacology in social work practice. The recipient of numerous honors and awards for her teaching, the creator of a popular preparation course for social work licensure, and the author of over 95 publications, she is a source to which students and professionals turn for up-to-date, accurate information on a variety of topics in the social work field. Psychopharmacology Handbook for the Non Medically Trained is an invaluable resource guide for all non-medically trained practitioners, providing therapists, social workers, and other counselors with effective tools and critical information to help them become better informed about all courses of mental health treatment for their clients.

In addition to reflecting an awareness of environmental issues, campus programmes demonstrate how seriously universities take sustainability at the institutional level. There is a lack of truly interdisciplinary publications that comprehensively address the issue of campus greening, and there is an even greater need for publications that do so at a truly international level. This book meets these needs.
