

A black and white photograph showing a woman on the left and a baby on the right, both in a pool of water. The woman is leaning forward, looking down at the baby. The baby is floating on its back, looking up. The water is dark and rippled. The overall mood is contemplative and intimate.

*Korval's Game* Sharon Lee, Steve Miller, 2011-05-03 The Liaden Universe series has enthralled thousands of readers and now two of its most exciting space adventure novels are combined in one Omni trade volume Plan B Val Con yos Phelium is a fugitive The heir of Clan Korval is wanted by the covert Liaden agency known as the Department of the Interior whose rulers have declared unofficial war against the entire clan With only his love Miri Robertson by his side Val Con plans a desperate gamble by forming an alliance with Clan Erob on the planet where Miri was born But Val Con's cousin Shan yos Galan can't wait for help that may never arrive With enemy agents closing in he invokes Plan B setting in motion a series of events that will have dire consequences not only for him and his life mate Priscilla Mendoza but all of Liad I Dare On the run from the agents of the Department of the Interior Val Con has been separated from Miri Shan Val Con's cousin and Shan's life mate Priscilla continue to search for him believing that he's the Clan's last hope for survival But the DOI is attacking Clan Korval in a more subtle fashion Pat Rin yos Phelium Val's never-do-well nearly identical cousin gambler and con artist is offered control of the clan The DOI believes they can manipulate him into serving their agenda They're wrong At the publisher's request this title is sold without DRM Digital Rights Management

Current Research on Sleep and Dreams United States. Public Health Service, Gay Gaer Luce, 1966 This monograph was stimulated by the extraordinary growth now apparent in an area generally identified as sleep and dream research for this recent concentration of scientific effort offers a singular example of the power that basic research can exert in penetrating the problems of mental health and illness In the past year alone the National Institute of Mental Health supported over 60 projects related in whole or in part to studies of sleep and dreams with awards totaling over 2 million The work of many of these NIMH investigators is included in this summary which extends beyond the Institute's program insofar as necessary to indicate the major trends of work in the area The report cannot of course encompass the classical studies already summarized in published literature nor even provide comprehensive survey of present day sleep research for although much of the scientific data on sleep have been generated during the last dozen years significant references in this field now number in the many thousands The mosaic of disciplines contributing to the study of sleep contains such diverse fields as psychiatry and mathematics psychology and biochemistry physiology and anthropology Nevertheless ferment about the subject matter and a spirit of cooperation across traditional disciplinary lines have made it possible to knit together data that might otherwise have lain unrelated in a variety of laboratories During the past year individual summaries of many of the projects cited here were distributed to scientists working in the field of sleep and dreams Many of the recipients felt that up to date reports especially in a field of such dynamic activity represented a unique solution to the problem of scientific information exchange Such communication it was felt provided a quick look at work in progress that might prevent duplication of effort and stimulate pertinent contacts among scientists thus aiding them

in their work It is hoped that this monograph will be a further part of that process Foreword **Current Research on Sleep and Dreams** Gay Gaer Luce,1965 Sleep 1972 W. P. Koella,P. Levin,1973-09-24 **Sleep and cognition in the elderly** Géraldine Rauchs,Julie Carrier,Philippe Peigneux,2015-05-26 Understanding the role of sleep and the mechanisms at play in ageing are among the most exciting challenges in neuroscience Although our understanding of the mechanisms governing sleep stages and their role in cognitive processes including memory functions is gradually increasing most of the currently available data have been gathered in young adults Still substantial physiological changes in sleep are observed with increasing age that may markedly impacts on daily functioning This is why this Research Topic focuses on our current understanding of the impact of age related changes in sleep architecture on various domains of cognition The three editors Julie Carrier Montr al Canada Philippe Peigneux Brussels Belgium and G raldine Rauchs Caen France are specialized in various fields of sleep research Here they bring together an outstanding group of neuroscientist and clinical investigators engaged in the study of sleep encompassing state of the art studies of sleep disorders such as sleep apnoea or REM sleep behaviour disorder studies assessing new treatments to improve sleep quality together with experts in various domains of cognition such as vigilance memory and dreams in a perspective aimed at offering the interested reader a comprehensive view of the impact of age related changes in sleep architecture on cognition *The Effects of Noise on Man* Karl D.
