How Children Learn the Meanings of Words Paul Bloom,2002-01-25 How do children learn that the word dog refers not to all four legged animals and not just to Ralph but to all members of a particular species How do they learn the meanings of verbs like think adjectives like good and words for abstract entities such as mortgage and story The acquisition of word meaning is one of the fundamental issues in the study of mind According to Paul Bloom children learn words through sophisticated cognitive abilities that exist for other purposes These include the ability to infer others intentions the ability to acquire concepts an appreciation of syntactic structure and certain general learning and memory abilities Although other researchers have associated word learning with some of these capacities Bloom is the first to show how a complete explanation requires all of them The acquisition of even simple nouns requires rich conceptual social and linguistic capacities interacting in complex ways This book requires no background in psychology or linguistics and is written in a clear engaging style Topics include the effects of language on spatial reasoning the origin of essentialist beliefs and the young child s understanding of representational art The book should appeal to general readers interested in language and cognition as well as to researchers in the field

Language Acquisition in Diverse Linguistic, Social and Cognitive Circumstances, volume II Maria Garraffa,Gary Morgan,Theodoros Marinis,Maria Teresa Guasti,2023-10-10

Theoretical and Computational Models of Word Learning: Trends in Psychology and Artificial Intelligence Gogate, Lakshmi,2013-02-28 The process of learning words and languages may seem like an instinctual trait inherent to nearly all humans from a young age However a vast range of complex research and information exists in detailing the complexities of the process of word learning Theoretical and Computational Models of Word Learning Trends in Psychology and Artificial Intelligence strives to combine cross disciplinary research into one comprehensive volume to help readers gain a fuller understanding of the developmental processes and influences that makeup the progression of word learning Blending together developmental psychology and artificial intelligence this publication is intended for researchers

practitioners and educators who are interested in language learning and its development as well as computational models formed from these specific areas of research *Advances in Web-Based Learning -- ICWL 2014* Elvira Popescu, Rynson W. H. Lau, Kai Pata, Howard Leung, Mart Laanpere, 2014-07-31 This book constitutes the refereed proceedings of the 13th International Conference on Web Based Learning ICWL 2014 held in Tallinn Estonia in August 2014 The 18 revised full papers presented together with 9 short papers were carefully reviewed and selected from about 78 submissions The papers are organized in topical sections on computer supported collaborative learning Web 2 0 and social learning environments personal learning environments game based learning learner modeling and learning analytics personalized and adaptive learning design model and implementation of e learning platforms and tools and pedagogical issues practice and experience sharing Exploring Working Memory Alan Baddeley, 2017-09-08 In the World Library of Psychologists series international experts present themselves career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings and their major theoretical and practical contributions Alan Baddeley has an international reputation as an eminent scholar and pioneer in the field of human memory and is principally known for the theory of working memory devised with Graham Hitch This model continues to be valuable today in recognising the functions of short term memory This volume includes a specially written introduction by Alan Baddeley which gives an overview of the start of his career and his entry into the field of Psychology Throughout the book he also provides introductions to the selection of works included and contextualises them in relation to changes in the field during this time *Exploring Working Memory* includes the author s most influential publications on topics including short term memory the distinctions between short and long term memory the theory of working memory the phonological loop the concept of the central executive and the episodic buffer This exceptional selection concludes with an article giving a broad overview of the author s current views on working memory and its relation to other theories in the field Through his outstanding work Alan Baddeley has become known as a world leading expert on human memory *Exploring Working Memory* is a unique collection which will be of great interest to both students and researchers interested in human memory from psychology backgrounds A Framework for Task-based Learning Jane Willis, 2021-10-07 A complete guide to the methodology and practice of task based language teaching For those who wish to adopt a genuinely learner centred approach to their teaching Probably the definitive guide to task based language teaching **Building Vocabulary with Greek and Latin Roots: A Professional Guide to Word Knowledge and Vocabulary Development** Timothy Rasinski, Nancy Padak, 2020-01-03 Did you know that Greek and Latin roots make up 90% of English words of two or more syllables Having an extensive vocabulary is key to students reading comprehension By adopting the strategies in this book teachers will help their students read more effectively setting a foundation for lifelong learning and reading success This teacher friendly resource written by Timothy Rasinski Nancy Padak Rick M Newton and Evangeline Newton provides the latest research on how to teach Greek and Latin roots It includes anecdotes from teachers

who have adopted these strategies and how they play out in today's classrooms With a research based rationale for addressing vocabulary in the classroom this K 12 resource is full of strategies for increasing reading comprehension instructional planning and building a word rich learning environment to support all students including English language learners

Translation of Thought to Written Text While Composing Michel Fayol, Denis Alamargot, Virginia Wise Berninger, 2012 Translation of cognitive representations into written language is one of the most important processes in writing This volume provides a long awaited updated overview of the field The contributors discuss each of the commonly used research methods for studying translation theorize about the nature of the cognitive and language representations and cognitive linguistic transformation mechanisms involved in translation during writing and make the case that translation is a higher order executive function that is fundamental to the writing process The book also reviews the application of research to practice that is the translation of the research findings in education and the work world for individuals who interact with others using written language to communicate ideas This volume provides a rich resource for student theorists and empirical researchers in cognitive psychology linguistics and education and teachers and clinicians who can use the research in their work
