Supporting Expeditionary Aerospace Force An Integrated Strategic Agile Combat Support Planning Framework:

Supporting Expeditionary Aerospace Forces Robert S. Tripp, 1999 This report addresses support of emerging Air Force employment strategies associated with Expeditionary Aerospace Forces EAFs Although much work remains to define these new responsibilities and prepare Air Force units to meet them it is clear that the EAF concepts will play a central role in the future Air Force FAF concepts turn on the premise that rapidly tailorable quickly deployable immediately employable and highly effective air and space force packages can serve as a viable substitute for permanent forward presence in both the strategic and the tactical arenas Success of the EAF will to a great extent depend on the effectiveness and efficiency of the Agile Combat Support ACS system *Supporting Expeditionary Aerospace Forces. An Integrated Strategic Agile Combat Support Planning Framework* ,1999 This report addresses support of emerging Air Force employment strategies associated with Expeditionary Aerospace Forces EAFs Although much work remains to define these new responsibilities and prepare Air Force units to meet them it is clear that the EAF concepts will play a central role in the future Air Force FAF concepts turn on the premise that rapidly tailorable quickly deployable immediately employable and highly effective air and space force packages can serve as a viable substitute for permanent forward presence in both the strategic and the tactical arenas Success of the EAF will to a great extent depend on the effectiveness and efficiency of the Agile Combat Support ACS system

Supporting Air and Space Expeditionary Forces Patrick Mills, 2006 As part of a series on supporting the Air and Space Expeditionary Force this report looks at the current operational architecture for incorporating combat support command and control CSC2 and proposes an expanded architecture for the future *Supporting Air and Space Expeditionary Forces* Ronald G. McGarvey, 2008 This monograph describes the new modeling approach developed to construct the CONUS CIRF network designs and presents detailed results from the specific analyses The analyses are based on F 15 F 16 and A 10 aircraft force structure bed downs resulting from the Defense Base Closure and Realignment Commission s 2005 recommendations For the three aircraft types all CONUS active duty bases Air National Guard ANG installations and Air Force Reserve Command AFRC installations possessing combat coded or training aircraft along with some Air Force Materiel Command AFMC bases were used as locations to be supported by CIRF networks CIRF network designs were constructed for aircraft engines TF34 F100 F110 electronic warfare EW pods ALQ 131 ALQ 184 Low Altitude Navigation and Targeting Infrared for Night LANTIRN navigation AN AAQ 13 and targeting pods AAQ 14s and F 15 avionics line replaceable units LRUs This set of commodities was chosen because previous analyses many of which were performed at RAND had suggested that they afforded the largest potential savings from consolidated maintenance Tasking scenarios considered in these analyses included normal peacetime training and readiness Air and Space Expeditionary Force AEF deployment taskings and major regional conflict MRC taskings **A Framework for Enhancing Airlift Planning and Execution Capabilities**

Within the Joint Expeditionary Movement System Robert S. Tripp, 2006 Recent operations have shed light on shortfalls

in Air Force intratheater airlift Using an expanded strategies to tasks framework the authors assess current intratheater airlift processes organizations doctrine training and systems This report catalogues identified shortfalls and recommends options for improving the Theater Distribution System The authors recommend separation of supply demand and integrator roles and adoption of a closed loop planning and execution process

Strategic Analysis of Air National Guard Combat Support and Reachback Functions Robert S. Tripp, 2006 VANGUARD is the Air National Guard ANG long range transformation program It calls for the ANG to evaluate new concepts prepare for new missions and adopt a new culture that capitalizes on ANG strengths and ensures that the ANG continues to add value as warfighters and to warfighters in the future while remaining ready reliable and accessible One way to support warfighting and warfighters is to continue to support the Air and Space Expeditionary Force AEF a concept developed by the Air Force to allow quick response when appropriate to national security interests with a tailored sustainable force The ANG already plays an important role in the AEF during wartime operations This monograph evaluates options for Air National Guard combat support and reachback missions in four Air Force mission areas to support the AEF investigates transformational opportunities for the ANG that would add the most value in achieving the desired operational effects and considers how changes in unit and above unit policies are likely to affect Total Force capabilities It should be of interest to logisticians operators and mobility planners throughout the Department of Defense especially those in the Air National Guard and active Air Force

Supporting Expeditionary Aerospace Forces Eric Peltz, 2000 The goal of the Expeditionary Aerospace Force EAF is to be a rapidly deployable strategic force This book argues that consolidating F 15 avionics intermediate maintenance and supporting operations from regional support bases would be a better way of achieving that goal than is presently used

Air Force Logistics Management Agency... , Air Force Journal of Logistics , 2009 A Framework for Evolving Agile Combat Support Concepts to Meet NATO Reaction Air Force Operational Requirements Robert S. Tripp, Charles Robert Roll, 2001 This paper presents a framework that could be used in evolving the Agile Combat Support ACS and mobility systems of participating partners to meet the operational needs of the NATO Reaction Air Force RAF Based on our experience in evaluating ACS mobility options to meet the United States Air Force Expeditionary Aerospace Force EAF operational goals we suggest that the NATO RAF concept may require a rethinking of the entire combat support system as was the case for the USAF EAF and that subsequently the strategic planning framework for combat support should also be re examined and enhanced To a large degree future force projection and resultant combat capability will be dependent upon strategic choices concerning combat support system design that will be made in the near future This paper explores a planning framework that is based on an integrated set of models and a process for making such strategic decisions Some USAF EAF results of analyses based on using this framework are presented as they may be relevant for the NATO RAF The paper also discusses some impediments in using this framework and evolving an effective coalition ACS system
