Surface Structure Robert Fiengo,1980 *The Language of Thought* Jerry A. Fodor,1975 In a compelling defense of the speculative approach to the philosophy of mind Jerry Fodor argues that while our best current theories of cognitive psychology view many higher processes as computational computation itself presupposes an internal medium of representation Fodor s prime concerns are to buttress the notion of internal representation from a philosophical viewpoint and to determine those characteristics of this conceptual construct using the empirical data available from linguistics and cognitive psychology **Readings in Philosophy of Psychology** Ned Block,1980 Essays discuss behaviorism reductionism physicalism functionalism the nature of mental states and the foundations of psychoanalysis *Language* George Melville Bolling,Bernard Bloch,1980 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin **Linguistic Inquiry** ,1981 Research on current topics in linguistic theory including new theoretical developments based on the latest international discoveries **The British Library General Catalogue of Printed Books 1976 to 1982** British Library,1983 **The Architecture of the Language Faculty** Ray Jackendoff,1997 Ray Jackendoff steps back to survey the broader theoretical landscape in linguistics in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing Over the past twenty five years Ray Jackendoff has investigated many complex issues in syntax semantics and the relation of language to other cognitive domains He steps back in this new book to survey the broader theoretical landscape in linguistics in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing Starting from the Minimalist necessity for interfaces of the grammar with sound meaning and the lexicon Jackendoff examines many standard assumptions of generative grammar that in retrospect may be seen as the product of historical accident He then develops alternatives more congenial to contemporary understanding of linguistic phenomena The Architecture of the Language Faculty seeks to situate the language capacity in a more general theory of mental representations and to connect the theory of grammar with processing To this end Jackendoff works out an architecture that generates multiple co constraining structures and he embeds this proposal in a version of the modularity hypothesis called Representational Modularity Jackendoff carefully articulates the nature of lexical insertion and the content of lexical entries including idioms and productive affixes The resulting organization of the grammar is compatible with many different technical realizations which he shows can be instantiated in terms of a variety of current theoretical frameworks Linguistic Inquiry Monograph No 28 *Semiotica* ,1969 **Monographic Series** Library of Congress,1981 **Language Acquisition and the Form of the Grammar** David Lebeaux,2000-10-20 Language Acquisition and the Form of the Grammar attempts to re think the ideal organization of the grammar given its need to be learned The book proposes a fundamental connection between the form of the adult grammar and the sequence of grammars which the child adopts in first language acquisition Challenging the conventional division between language acquisition and

syntax this influential work constructs a new understanding of phrase structure bringing syntactic data to bear on phrase structure composition Two new phrase structure composition operations are proposed Adjoin which adjoins adjuncts into the structure and Project which fuses open class and closed class structures The author also introduces the novel concept of subgrammars successively larger grammars that take the child from the initial state to the adult grammar This work will be of interest to those in the areas of syntax language acquisition learnability and cognitive science in general
