Surface Characteristics of Fibers and Textiles Martin J. Schick, 1975 *Friction in Textile Materials* B S

Gupta, 2008-06-02 Friction is a major issue in both the production of textiles and in the finished product This authoritative book reviews how friction occurs and the ways it can be measured and controlled The book begins by looking at how friction can be defined and how the structure and properties of textile fibres lead to friction behaviour It also discusses slip stick phenomena in textiles and ways of measuring friction in yarns and fabric The second part of the book reviews friction in particular textiles including cotton wool and synthetic fibres as well as woven fabrics These and other chapters also discuss ways of controlling friction including fabric finishes and lubricants With its distinguished editor and contributions from some of the world's leading authorities in the subject Friction in textile materials is a standard reference for the textile industry and those researching this important topic An authoritative review of friction its management and control *Surface*

Modification of Textiles Q Wei, 2009-08-26 The surface of textiles offers an important platform for functional modifications in order to meet special requirements for a variety of applications The surface modification of textiles may be achieved by various techniques ranging from traditional solution treatment to biological approaches This book reviews fundamental issues relating to textile surfaces and their characterisation and explores the exciting opportunities for surface modification of a range of different textiles Introductory chapters review some important surface modification techniques employed for improved functional behaviour of textiles and the various surface characterisation methods available Further chapters examine the different types of surface modification suitable for textiles ranging from the use of plasma treatments and physical vapour deposition to the use of nanoparticles Concluding chapters discuss surface modification strategies for various applications of textiles Surface modification of textiles is a valuable resource for chemists surface scientists textile technologists fibre scientists textile engineers and textile students Reviews fundamental issues relating to textiles surfaces and their characterisation Examines various types of surface modification suitable for textiles including plasma treatments and nanoparticles Discusses surface modification strategies for textile applications such as expansion into technical textile applications Polyolefin Fibres S C O Ugbolue, 2017-06-09 Polyolefin Fibres Structure Properties and Industrial

Applications Second Edition explores one of the most widely used commercial polymers with a focus on the most important polyolefins namely polyethylene polypropylene and polyolefin bicomponent fibres These versatile fibres are durable chemically resistant lightweight economical and functional This new edition has been updated and expanded to include cutting edge research on a broad range of advanced applications Part I covers the structure and properties of polyolefin fibres incorporating a new chapter on the environmental aspects of polyolefin use Part II examines the methods for improving the functionality of polyolefins providing essential information for those engaged in developing high performance materials A final group of chapters addresses how polyolefin fibres can be incorporated into specific textile applications such

as automotive geotextile biomedical and hygiene products and explores potential future development This book is an essential reference for textile technologists and manufacturers polymer and fibre scientists yarn and fabric manufacturers biomedical and device engineers and industrialists and researchers Introduces the types properties and structure of polyolefin fibers for readers new to the polyolefins field Examines methods to improve the functionality of polyolefin fibers providing essential information for textile technologists and research and development managers engaged in developing high performance materials Presents existing and potential applications of polyolefin fibers exploring how they can expand the range of commercial polyolefin based products
