Milton's Places of Hope Mary C. Fenton, 2017-03-02 In early modern culture and in Milton's poetry and prose this book argues the concept of hope is intrinsically connected with place and land Mary Fenton analyzes how Milton sees hope as bound both to the spiritual and the material the internal self and the external world Hope as Fenton demonstrates comes from commitment to literal places such as the land ideological places such as the nation and sacred interior places such as the human soul Drawing on an array of materials from the seventeenth century including emblems legal treatises political pamphlets and prayer manuals Fenton sheds light on Milton's ideas about personal and national identity and where people should place their sense of power and responsibility Milton's politics and where he thought the English nation was and where it should be heading and finally Milton's theology and how individuals relate to God

Landscapes of Hope Brian McCammack,2017-10-16 Winner of the Frederick Jackson Turner Award Winner of the George Perkins Marsh Prize Winner of the John Brinckerhoff Jackson Book Prize A major work of history that brings together African American history and environmental studies in exciting ways Davarian L Baldwin Journal of Interdisciplinary History Between 1915 and 1940 hundreds of thousands of African Americans left the rural South to begin new lives in the urban North In Chicago the black population quintupled to more than 275 000 Most historians map the integration of southern and northern black culture by looking at labor politics and popular culture An award winning environmental historian Brian McCammack charts a different course considering instead how black Chicagoans forged material and imaginative connections to nature The first major

history to frame the Great Migration as an environmental experience *Landscapes of Hope* takes us to Chicago's parks and beaches as well as to the youth camps, vacation resorts, farms and forests of the rural Midwest. Situated at the intersection of race and place in American history, it traces the contours of a black environmental consciousness that runs throughout the African American experience. Uncovering the untold history of African Americans' migration to Chicago as they constructed both material and immaterial connections to nature. Teona Williams *Black Perspectives* A beautifully written, smart, painstakingly researched account that adds nuance to the growing field of African American environmental history. Colin Fisher *American Historical Review* If in the South, nature was associated with labor for the inhabitants of the crowded tenements in Chicago, nature increasingly became a source of leisure. Between Struggle and Hope Valerie Miller, 2019-08-22 In July 1979, Nicaragua began a process of profound structural transformation to redistribute power and wealth in order to redress past societal inequities. This book critically examines the planning and implementation of one of the first programs of national transformation: the Nicaraguan National Literacy Crusade, an educational effort directly involving almost one-fourth of the country's population. International experts praised the program as an exemplary model for national development and unanimously chose the campaign to receive grand prize in literacy. A vivid combination of anecdote and analysis, *Between Struggle and Hope* is a study of policymaking and institution building within a revolutionary society. Written by an international adviser to the program, the book provides an insider's look at educational planning and political formation. A critique, it combines the human story of the struggle to create the literacy campaign with a detailed evaluation of program results, both positive and negative. Unique in the literature, it allows the reader to follow firsthand the behind-the-scenes development of an educational campaign designed as part of a national plan of structural transformation and to share the personal concerns, criticisms, and analysis of the program planners. *Between Struggle and Hope* offers a rare opportunity to examine the process of political change through education and to probe the internal dynamics of revolution.

What is the role of hope in the lives of individuals and collectives mired in conflict and political unrest How do political elites utilize hope and skepticism to mobilize citizens and how does hope manifest itself at the grassroots level Under what conditions can hope proliferate in the seemingly hopeless situations of intractable conflicts and why do despair and fear often prevail Is being hopeful necessarily a good thing or are there situations when hope should be avoided or at least minimized These questions are not only thought provoking but also highly relevant to the reality of millions of people around the world struggling for justice equality and peace **Selected Writings of Maureen O'Hara on the Art, Science, and Hope of Humanism** Keith Tudor, Maureen O'Hara, 2025-06-30 This book presents the work of the eminent British American
