This collection of essays reflects the current interdisciplinary and international nature of the history of nursing scholarship. Covering a range from the eighteenth to the twentieth century, this book draws on research from eleven different countries to address the issues of professionalism within nursing, the social and ethical issues which are woven into the relationship between the nurse, midwife, and her patient, client, the trans-cultural dimensions nurses create when they move from one culture to another, and the recent developments in historiography. *Annual Report of the Superintendent of Public Instruction of the State of Michigan* Michigan. Perspectives in Paediatric Oncology Nursing Faith Gibson, Louise Soanes, Beth Sepion, 2006-06-14. Originally emanating from presentations at an international conference, this text brings together research and practice development from three perspectives: practice, management, and education. Within these three sections, the book presents a series of chapters written mainly by practitioners but some in collaboration with academics. At the end of each section, there is a commentary by a practitioner, manager, or researcher which aims to offer a helpful critique on the papers in their section, guiding the reader to consider other areas of research and practice development. At a time when practitioners are being called to produce and use evidence in their practice, this book should offer a valuable contribution to that evidence base.
