Hirt, 2012-03-15 It can be said that all of human history is environmental history for all human action happens in an environment in a place This collection of essays explores the environmental history of the Pacific Northwest of North America addressing questions of how humans have adapted to the northwestern landscape and modified it over time and how the changing landscape in turn affected human society economy laws and values Northwest Lands and Peoples includes essays by historians anthropologists ecologists a botanist geographers biologists law professors and a journalist It addresses a wide variety of topics indicative of current scholarship in the rapidly growing field of environmental history

Many Wests David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West's regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West's different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions

Irrigated Eden Mark Fiege, 2009-11-23 Irrigation came to the arid West in a wave of optimism about the power of water to make the desert bloom Mark Fiege's fascinating and innovative study of irrigation in southern Idaho's Snake River valley describes a complex interplay of human and natural systems Using vast quantities of labor irrigators built dams excavated canals laid out farms and brought millions of acres into cultivation But at each step nature rebounded and compromised the intended agricultural order The result was a new and richly textured landscape made of layer upon layer of technology and intractable natural

forces one that engineers and farmers did not control with the precision they had anticipated Irrigated Eden vividly portrays how human actions inadvertently helped to create a strange and sometimes baffling ecology Winner of the Idaho Library Association Book Award 1999 Winner of the Charles A Weyerhaeuser Award Forest History Society 1999 2000 **Snake**, 1995 Idaho Yesterdays, 2000 **Public Power, Private Dams** Karl Boyd Brooks, 2009-11-17 In the years following World War II the world's biggest dam was almost built in Hells Canyon on the Snake River in Idaho Karl Boyd Brooks tells the story of the dam controversy which became a referendum not only on public power expansion but also on the environmental implications of the New Deal's natural resources and economic policy Private power critics of the Hells Canyon High Dam posed difficult questions about the implications of damming rivers to create power and to grow crops Activists attorneys and scientists pioneered legal tactics and political rhetoric that would help to define the environmental movement in the 1960s The debate however was less about endangered salmon or threatened wild country and more about who would control land and water and whether state enterprise or private capital would oversee the supply of electricity By thwarting the dam's construction Snake Basin irrigators retained control over water as well as economic and political power in Idaho putting the state on a postwar path that diverged markedly from that of bordering states In the end the opponents of the dam were responsible for preserving high deserts and mountain rivers from radical change With **Public Power Private Dams** Karl Brooks makes an important contribution not only to the history of the Pacific Northwest and the region's anadromous fisheries but also to the environmental history of the United States in the period after World War II **Old Man's Playing Ground** Gabriel M. Plateau and Northwest Plains When Hudson's Bay Company surveyor Peter Fidler made contact with the Ktunaxa at the Gap of the Oldman River in the winter of 1792 his Piik ni guides brought him to the river's namesake. These were the playing grounds where Napi or Old Man taught the various nations how to play a game as a way of making peace. In the centuries since travelers, adventurers, and scholars have recorded several accounts of Old Man's Playing Ground and of the hoop and arrow game that was played there. Although it has been destroyed, much can be learned from an interdisciplinary study of Old Man's Playing Ground. Oral traditions of the Piik ni and other First Nations of the Northwest Plains and Interior Plateau, together with textual records spanning centuries, show it to be a place of enduring cultural significance, irrespective of its physical remains. Knowledge of the site and the hoop and arrow game played there is widespread, in keeping with historic and ethnographic accounts of multiple groups meeting and gambling at the site. In this work, oral tradition, history, and ethnography are brought together with a geomorphic assessment of the playing ground's most probable location, a floodplain scoured and rebuilt by floodwaters of the Oldman and the archaeology of adjacent prehistoric campsites. D1Po 8 Taken together, the locale can be understood as a nexus for cultural interaction and trade through the medium of gambling and games on the natural frontier between peoples of the Interior Plateau and Northwest Plains.

Meinig, 2016-06-01 Dismissed in early years as a wasteland, the rolling open country that covers the interior parts of Washington, Oregon, and Idaho is today one of the richest farmlands in the nation. This work is the story of its transformation. Meinig traces all of the aspects of its development by combining geographic description with historical narrative.

Zondervan Dictionary of Biblical Imagery John A. Beck, 2011-01-04 Learning the meaning and significance of biblical images will revolutionize your grasp of the Bible as a whole Scripture is packed with symbolic imagery and metaphors looms donkeys water cisterns grapes sackcloth all carry symbolic or emotional weight that sharpens the broader picture of the passage The biblical authors used their reality to enhance the impact of their message on the audience around them and the language they used is rich with meaning The words might be familiar today but the cultural connotations of things like manna millstones or myrrh might be missed by contemporary Christians and might cause us to lose the fullest significance of the Bible passage The Zondervan Dictionary of Biblical Imagery surveys the use and connotations of familiar images in the Bible to illustrate the intricate and subtle ways they are put to work in the text The types of entries include Cultural artifacts from the biblical world such as arrow or sandal Components of natural history such as fox or fig tree Named places such as Mount Sinai or Nazareth Components of Israel's physical geography such as mountain or wilderness Each entry describes an image's characteristics appearance intended use and cultural connotations as well as the rhetorical impact of its use in the Bible As you read you'll begin to understand things like why Jesus called for us to become the salt of the earth why dew was a controversial topic in Bible times and why a roof might be mentioned to draw attention to a violation of expected norms With accessible well illustrated entries and numerous black white visuals The Zondervan Dictionary of Biblical Imagery is an inspiring portal into the biblical world for any student of the Bible
