Feinman,Michael Lewis,2013-06-29 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child

development over the last two decades or so seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort. The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity among those diverse lines of research on human development can be woven into a fabric of meaning and understanding. Scientists, scholars, and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach. Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion. It is hoped that this series, which brings together research on infant biology, developing infant capacities, animal models, and impact of social, cultural, and familial forces on development, and the distorted products of such forces under certain circumstances, serves these important social and scientific needs. *Early Childhood Care and Education in Canada* Larry Prochner, 2011-11-01

Formal programs for the care and education of young children in Canada have a history that goes back almost 200 years, yet issues surrounding services for our youngest Canadians continue to be hotly contested as we begin a new century. In Canada, early childhood care and education are striking for their tremendous diversity on such key issues as curriculum, financing, and teacher education. The range of programs and philosophies can be overwhelming for parents, practitioners, academics, researchers, and policy makers alike. Larry Prochner and Nina Howe reflect the variation within the field by bringing together a multidisciplinary group of experts to address key issues in the field. What programs are currently available and what are their origins? How are adults prepared for work in these programs? How do children within the programs spend their day? What policies guide the programs? How has the field reflected on itself through research? There are no simple answers, but the essays in this collection contribute to a creative reframing of the questions. The authors include psychologists, sociologists, historians, teacher educators, and social policy analysts. *Early Childhood Care and Education in Canada* will be of interest to students, teachers, and researchers in child study, early education, policy studies, and history. With cutbacks to early education programs, a shortage of daycare spaces, and uncertainty about future levels of support, the time is ripe for a close examination of the services we provide for our youngest citizens. *Current Catalog* National Library of Medicine (U.S.), 1982. For this symposium, there also were commentary papers prepared by members of the University of Minnesota community. Emotional Prevention and Intervention Programming for Preschoolers Susanne A. Denham, Rosemary Burton, 2012-12-06 Social and Emotional Prevention and Intervention Programming for Preschoolers rests on the idea that young children under optimal circumstances develop substantial abilities in social and emotional domains by the time they enter school. These abilities contribute to their success and well being during these early years but even more importantly to both their successful adaptation to school personal and academic and their long term mental health. The chapters of this volume present theoretical foundations for and explanations of what important adults in young children's lives preschool teachers daycare providers parents can do to encourage the development of such social emotional abilities including promoting secure attachment relationships providing positive behavior guidance and assisting children in developing emotion knowledge emotion regulation social problem solving skills and other positive social behaviors. In addition the book reviews the current state of early childhood programming in each of these crucial areas with the addition of a chapter on emergent parent programming on emotion coaching. Recommendations are made for making such programming work for assessing individual children's development and program efficacy and necessary future directions for this area are detailed. Lamb, Kathleen J. Sternberg, Carl-Philip Hwang, Anders G. Broberg, 2014-01-02 Child care is an integral part of the web of influences and experiences that shape children's development. Utilizing an interdisciplinary approach that covers both historic and economic contexts this unique book characterizes child care in 18 countries on five continents. Specific historical roots and the current social contexts of child care are delineated in industrialized as well as in developing countries. To increase the depth of crosscultural analysis and integration commentators from countries and disciplines other than the authors comment on the issues raised in each chapter.
