The culmination of twenty years of research this book is a cross cultural exploration of the ways in which age gender and culture affect the development of social behavior in children The authors and their associates observed children between the ages of two and ten going about their daily lives in communities in Africa India the Philippines Okinawa Mexico and the United States This rich fund of data has enabled them to identify the types of social behavior that are universal and those which differ from one cultural environment to another Whiting and Edwards shed new light on the nature nurture question in analyzing the behavior of young children they focus on the relative contributions of universal physiological maturation and universal social imperatives They point out cross cultural similarities but also note the differences in experience between children who grow up in simple and in complex societies They show that knowledge of the company children keep and of the proportion of time they spend with various categories of people makes it possible to predict important aspects of their interpersonal behavior An extension and elaboration of the classic *Children of Six Cultures* Harvard 1975 *Children of Different Worlds* will appeal to the same audience developmental psychologists social psychologists anthropologists and educators and is sure to be equally influential

An Introduction to Social Psychology Luther Lee Bernard,1926 The present Introduction to Social Psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given It seems to the writer that the time has arrived when schools of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically In a sense social psychology overlaps a very large portion of social science and of psychology and education In this respect it is central to all psychological and social science disciplines This fact necessarily renders the content of social psychology voluminous It is no longer possible to treat this subject adequately in small compass The text books which have so far appeared although for the most part excellent from their several viewpoints are nevertheless but partial treatments So notably true is this that there exists a marked controversy as to what properly constitutes social psychology In Part I of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole Originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second

book in social theory following directly upon the introductory course in sociology in departments sociology If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which care to use it in this way That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published Preface PsycINFO Database Record c 2006 APA all rights reserved
