France,Bernhard Rumpe,2003-07-31 This book constitutes the refereed proceedings of the Second International Conference on the Unified Modeling Language UML 99 held in Fort Collins CO USA in September 1999 The 44 revised full papers presented together with two invited contributions and three panel summaries were carefully reviewed and selected from a total of 166 submissions The papers are organized in topical sections on software architecture UML and other notations formalizing interactions meta modeling tools components UML extension mechanisms process modeling real time systems constraint languages analyzing UML models precise behavioral modeling applying UML sequence design and coding **Aligning Enterprise, System, and Software Architectures** Mistrik, Ivan,Tang, Antony,Bahsoon, Rami,Stafford, Judith A.,2012-10-31 This book covers both theoretical approaches and practical solutions in the processes for aligning enterprise systems and software architectures Provided by publisher *Model Driven Engineering Languages and Systems* Gregor Engels,Bill Opdyke,Douglas C. Schmidt, Frank Weil,2007-09-12 This book constitutes the refereed proceedings of the 10th International Conference on Model Driven Engineering Languages and Systems formerly the UML series of conferences MODELS 2007 held in Nashville USA September 30 October 5 2007 The 45 revised full papers were carefully reviewed and selected from 158 initial submissions The papers are organized in topical sections *Refinement* John Derrick,Eerke Boiten,2018-09-03 Refinement is one of the cornerstones of a formal approach to software engineering Refinement is all about turning an abstract description of a soft or hardware system into something closer to implementation It provides that essential bridge between higher level requirements and an implementation of those requirements This book provides a comprehensive introduction to refinement for the researcher or graduate student It introduces refinement in different semantic models and shows how refinement is defined and used within some of the major formal methods and languages in use today It 1 introduces the reader to different ways of looking at refinement relating refinement to observations 2 shows how these are realised in different semantic models 3 shows how different formal methods use different models of refinement and 4 how these models of refinement are related *Software Adaptation in an Open Environment* Yu Zhou,Taolue Chen,2017-04-11 The book is about a very active research field in software engineering In modern society the fact of the world s high reliance on software requires the system s robustness i e continual availability and satisfactory service quality This requirement gives rise to the popularity of the research on the self adaptive software in open environment There are some academic conferences dedicated to this field But there is a lack of monographs about the topic We believe such need is unmet in marketplace By publishing the book it can help bridge the gap and bring benefits to readers thereof Key Features The topic is well motivated interesting and actively studied worldwide The research represents as the state of the art in the field The technical part of the book is rigidly evaluated The theoretical part of the book is sound and proved The organization

and presentation of the book will be double checked by professional scholars

Software Architecture Patrick Donohoe, 1999-02-28 Software architecture is a primary factor in the creation and evolution of virtually all products involving software. It is a topic of major interest in the research community where numerous formalisms, processes and technologies are under development. Architecture is also of major interest in industry because it is recognized as a significant leverage point for manipulating such basic development factors as cost, quality and interval. Its importance is attested to by the fact that there are several international workshop series as well as major conference sessions devoted to it. The First Working IFIP Conference on Software Architecture WICSA1 provided a focused and dedicated forum for the international software architecture community to unify and coordinate its effort to advance the state of practice and research. WICSA 1 was organized to facilitate information exchange between practising software architects and software architecture researchers. The conference was held in San Antonio, Texas, USA from February 22nd to February 24th, 1999. It was the initiating event for the new IFIP TC 2 Working Group on Software Architecture. This proceedings document contains the papers accepted for the conference. The papers in this volume comprise both experience reports and technical papers. The proceedings reflect the structure of the conference and are divided into six sections corresponding to the working groups established for the conference.

IFM'99 Keijiro Araki, Andy Galloway, Kenji Taguchi, 2012-12-06 Formal methods have been established as the rigorous engineering methodology for the system development. Applying formal methods to a large and complex system development often requires the modelling of different aspects of such a system. For instance, complex systems such as integrated avionics systems engine control software can involve functional and timing requirements that must be eventually implemented as executing code on a communicating distributed topology. This book contains the papers presented at the First International Workshop on Integrated Formal Methods held at the University of York in June 1999. The conference provided a forum for the discussion of theoretical aspects of combining behavioural and state-based formalisms and practical solutions to the industrial problems of this approach.

Autonomic Computing in Cloud Resource Management in Industry 4.0 Tanupriya Choudhury, Bhupesh Kumar Dewangan, Ravi Tomar, Bhupesh Kumar Singh, Teoh Teik Toe, Nguyen Gia Nhu, 2021-08-04 This book describes the next generation of industry: Industry 4.0 and how it holds the promise of increased flexibility in manufacturing along with automation, better quality and improved productivity. The authors discuss how it thus enables companies to cope with the challenges of producing increasingly individualized products with a short lead time to market and higher quality. The authors posit that intelligent cloud services and resource sharing play an important role in Industry 4.0, anticipated Fourth Industrial Revolution. This book serves the different issues and challenges in cloud resource management. CRM techniques with proper proposed solution for IT organizations. The book features chapters based on the characteristics of autonomic computing with its applicability in CRM. Each chapter features the techniques and analysis of each mechanism to make better resource management in cloud.
