community to unify and coordinate its effort to advance the state of practice and research WICSA 1 was organized to facilitate information exchange between practising software architects and software architecture researchers The conference was held in San Antonio Texas USA from February 22nd to February 24th 1999 it was the initiating event for the new IFIP TC 2 Working Group on Software Architecture This proceedings document contains the papers accepted for the conference The papers in this volume comprise both experience reports and technical papers The proceedings reflect the structure of the conference and are divided into six sections corresponding to the working groups established for the conference

**Formal Foundations for Software Engineering Methods** Heinrich Hußmann, 1997-09-23 In this book Hussmann builds a bridge between the pragmatic methods for the design of information systems and the formal mathematical background Firstly the principal feasibility of an integration of the different methods is demonstrated Secondly the formalism is used as a systematic semantic analysis of the concepts in SSADM a British standard structured software engineering method Thirdly a way of obtaining a hybrid formal pragmatic specification using a combination of SSADM notations and formal SPECTRUM specifications is shown This well written book encourages scientists and software engineers to apply formal methods to practical software development problems
