Statistical Methods in Software Engineering Nozer D. Singpurwalla, Simon P. Wilson, 2012-12-06 This preface pertains to three issues that we would like to bring to the attention of the readers our objectives our intended audience and the nature of the

material We have in mind several objectives The first is to establish a framework for dealing with uncertainties in software engineering and for using quantitative measures for decision making in this context The second is to bring into perspective the large body of work having statistical content that is relevant to software engineering which may not have appeared in the traditional outlets devoted to it Connected with this second objective is a desire to streamline and organize our own thinking and work in this area Our third objective is to provide a platform that facilitates an interface between computer scientists and statisticians to address a class of problems in computer science It appears that such an interface is necessary to provide the needed synergism for solving some difficult problems that the subject poses Our final objective is to serve as an agent for stimulating more cross disciplinary research in computer science and statistics To what extent the material here will meet our objectives can only be assessed with the passage of time Our intended audience is computer scientists software engineers and reliability analysts who have some exposure to probability and statistics Applied statisticians interested in reliability problems are also a segment of our intended audience

Favorskaya, 2020-01-21. This book addresses many criteria decision making MCDM, a process used to find a solution in an environment with several criteria. In many real world problems there are several different objectives that need to be taken into account. Solving these problems is a challenging task and requires careful consideration. In real applications often simple and easy to understand methods are used as a result the solutions accepted by decision makers are not always optimal solutions. On the other hand algorithms that would provide better outcomes are very time consuming. The greatest challenge facing researchers is how to create effective algorithms that will yield optimal solutions with low time complexity. Accordingly many current research efforts are focused on the implementation of biologically inspired algorithms BIAs which are well suited to solving uni objective problems. This book introduces readers to state of the art developments in biologically inspired techniques and their applications with a major emphasis on the MCDM process. To do so it presents a wide range of contributions on e.g. BIAs, MCDM, nature inspired algorithms, multi criteria optimization, machine learning and soft computing.

Quality of Software Architectures and Software Quality Ralf H. Reussner, Johannes Mayer, Judith A. Stafford, Sven Overhage, Steffen Becker, Patrick J. Schroeder, 2005-09-09. This book constitutes the joint refereed proceedings of two colocated events: the First International Conference on the Quality of Software Architectures QoSA 2005 and the Second International Workshop on Software Quality SOQUA 2005 held in Erfurt, Germany, in September 2005. The 18 revised full papers presented were carefully reviewed and selected from 48 submissions. For QoSA 2005 only 12 papers of the 31 submitted were accepted for presentation; they are concerned with research and experiences that investigate the influence a specific software architecture has on software quality aspects. The papers are organized in topical sections on software architecture evaluation, formal approaches to model driven QoS, handling modelling QoS in software architectures, software architectures applied, architectural design for QoS, and model driven software reliability estimation. The 6 papers accepted for SOQUA 2005 from 17 submissions mainly focus on quality assurance and on software testing. They are organized in topical sections on test case selection, model based testing, unit testing, and performance testing. **Software Engineering**
