*The Business, Policy, and Economics of Neurosurgery* Richard P. Menger, MD, MPA, Christopher M. Storey,

MD, PhD, Anil Nanda, MD, MPH, 2018-06-29 The concept of this project is based on the premise that neurosurgeons are vital agents in the application of the American health care apparatus. They remain the true advocates for patients undergoing surgery for a neurological condition. Yet the tenets of health care economics, health care policy, and the business of medicine remain largely debated within the context of politicians, policy experts, and administrators. This textbook will ease that gap. It will bring material generally absent from medical curricula into discussion. It will make potent features of health care economics, policy, and the business of practice digestible to clinical neurosurgeons in order to help them better treat their patients. The information provided in this text will also provide an excellent foundation for understanding the mechanics of running a neurosurgical practice. It simultaneously addresses career progression and opportunity evaluation. **Podiatry Workforce** P. Hannah Davis, Joseph Barbano, Kenneth W. How do hierarchies of race class gender and law school status condition the career trajectories of lawyers And how do individual lawyers strategically navigate the constraints and opportunities of their environments Where do they find professional satisfaction This book offers an unprecedented account of opportunity structures and social stratification within the early 21st century American legal profession combining unique longitudinal survey data with interviews storytelling and insights from social theory Starting in 2000 the authors collected over 10 000 survey responses from more than 5 000 lawyers following these lawyers through the first twenty years of their careers They also conducted in depth interviews with more than 200 lawyers They contextualize their findings through attention to the features of a market driven legal profession in particular the growth in recent decades of the private sector relative to the public sector and corresponding disparities in earnings and status between these different segments The analysis in this book reveals a legal profession that is highly stratified Although individual lawyers exercise agency and often find satisfaction in their work there are deep divisions within the profession by client type and practice setting and women and attorneys of color face discrimination and persistent barriers to advancement The careers of lawyers both reflect and reproduce inequalities in law and society writ large
