Stunted Lives Stagnant Economies Poverty Disease And Underdevelopment:

Stunted Lives, Stagnant Economies Eileen Stillwaggon, 1998 *Stunted Lives Stagnant Economies* describes in vivid detail the living conditions of the poor in developing countries and the diseases and injuries that result from this environment of need. Most of the diseases that affect the poor—cholera, summer diarrhea, tuberculosis, lice, worms, leprosy—result from the poverty of their environment. Poverty also determines the availability and effectiveness of the medical response. Using Argentina as a case study, Eileen Stillwaggon argues that making good health available to everyone is not a scientific problem but an economic one.

Cities From Scratch Brodwyn Fischer, Bryan McCann, Javier Auyero, 2014-02-28 This collection of essays challenges long entrenched ideas about the history, nature, and significance of the informal neighborhoods that house the vast majority of Latin America's urban poor. Until recently, scholars have mainly viewed these settlements through the prisms of crime and drug-related violence, modernization and development theories, populist or revolutionary politics, or debates about the cultures of poverty. Yet shantytowns have proven both more durable and more multifaceted than any of these perspectives foresaw. Far from being accidental offshoots of more dynamic economic and political developments, they are now a permanent and integral part of Latin America's urban societies, critical to struggles over democratization, economic transformation, identity politics, and the drug and arms trades. Integrating historical, cultural, and social scientific methodologies, this collection brings together recent research from across Latin America, from the informal neighborhoods of Rio de Janeiro and Mexico City to Managua and Buenos Aires. Amid alarmist exposés, *Cities from Scratch* intervenes by considering Latin American shantytowns at a new level of interdisciplinary complexity. Contributors: Javier Auyero, Mariana Cavalcanti, Renato Diniz, Emilio Duhau, Sujatha Fernandes, Brodwyn Fischer, Bryan McCann, Edward Murphy, Dennis Rodgers.

Globalization and Antiglobalization Henry Veltmeyer, 2017-07-05 Globalization has changed the context for and the organizational forms of politics, unleashing forces in support of and in opposition to the globalization dynamic. Investigating the dynamics of change and development in two regions of the world economy, Latin America and Asia, this book evaluates these forces, their political dynamics, and the responses of governments and citizens.

Globalization and Antiglobalization Jonathan Rutherford, 2018-05-08 This title was first published in 2003. Globalisation can be seen to provide the context for epoch-defining changes in social and economic forms of organisation. However, it has also changed the context for and the organisational forms of politics, unleashing forces in support of and in opposition to the globalisation dynamic. This text examines the dynamics of change and development in two regions of the world economy, Latin America and Asia, and is a series of explorations into the forces, their political dynamics, and the responses of governments and citizens. The focus of the explorations and regional case studies is on the role of the nation-state, international organisations, and social movements.

Out of the Shadows Patricia Fernández-Kelly, Jon Shefner, 2010-11 Since the beginning of scholarly writing about the informal economy in the mid 1970s the debate has evolved from addressing survival strategies of the poor to considering the implications for national development and the global economy Simultaneously research on informal politics has ranged from neighborhood clientelism to contentious social movements basing their claims on a variety of social identities in their quest for social justice Despite related empirical and theoretical concerns these research traditions have seldom engaged in dialogue with one another Out of the Shadows brings leading scholars of the informal economy and informal politics together to address how globalization has influenced local efforts to resolve political and economic needs and how these seemingly separate issues are indeed deeply related In addition to the editors contributors are Javier Auyero Miguel Angel Centeno Sylvia Chant Robert Gay Mercedes Gonz lez de la Rocha Jos Itzigsohn Alejandro Portes and Juan Manuel Ramirez

Foreign and Domestic Investment in Argentina Alison E. Post, 2014-04-17 Political economy scholarship suggests that private sector investment and thus economic growth is more likely to occur when formal institutions allow states to provide investors with credible commitments to protect property rights This book argues that this maxim does not hold for infrastructure privatization programs Rather differences in firm organizational structure better explain the viability of privatization contracts in weak institutional environments Domestic investors or if contracts are granted subnationally domestic investors with diverse holdings in their contract jurisdiction work most effectively in the volatile economic and political environments of the developing world They are able to negotiate mutually beneficial adaptations to their contracts with host governments because cross sector diversification provides them with informal contractual supports The book finds strong empirical support for this argument through an analysis of fourteen

water and sanitation privatization contracts in Argentina and a statistical analysis of sector trends in developing countries

Many Urbanisms Martin J. Murray, 2022-02-15 Winner 2023 Choice Outstanding Academic Title Now for the first time in history the majority of the world's population lives in cities But urbanization is accelerating in some places and slowing down in others The sprawling megacities of Asia and Africa as well as many other smaller and medium sized cities throughout the Global South are expected to continue growing At the same time older industrial cities in wealthier countries are experiencing protracted socioeconomic decline Nonetheless mainstream urban studies continues to treat a handful of superstar cities in Europe and North America as the exemplars of world urbanism even though current global growth and development represent a dramatic break with past patterns Martin J Murray offers a groundbreaking guide to the multiplicity heterogeneity and complexity of contemporary global urbanism He identifies and traces four distinct pathways that characterize cities today tourist entertainment cities with world class aspirations struggling postindustrial cities megacities experiencing hypergrowth and instant cities or master planned cities built from scratch Murray shows how these different types of cities respond to different pressures and logics rather than progressing through the stages of a predetermined linear path He highlights new spatial patterns of urbanization that have undermined conventional understandings of the city exploring the emergence of polycentric fragmented haphazard and unbounded metropolises Such cities he argues should not be seen as deviations from a norm but rather as alternatives within a constellation of urban possibility Innovative and wide ranging Many Urbanisms offers ways to understand the disparate forms of global cities today on their own terms
