The Tanks of Operation Barbarossa Boris Kavalerchik, 2020-01-31 An absorbing study of the tanks and the tank tactics of the Red Army and the Wehrmacht during the Axis invasion of the Soviet Union in World War II When the Germans invaded the Soviet Union in 1941 the Red Army had four times as many tanks as the Wehrmacht and their tanks were seemingly superior yet the Wehrmacht won the border battles with extraordinary ease The Red Army's tank force was pushed aside and for the most

part annihilated How was this victory achieved and were the Soviet tanks really as well designed as is often believed These are the basic questions Boris Kavalerchik answers in this compelling study of tank warfare on the Eastern Front Drawing on technical and operational documents from Russian archives many of which were classified until recently and are unknown to Western readers he compares the strengths and weakness of the tanks and the different ways in which they were used by the opposing armies His work will be essential reading for military historians who are interested in the development of armored warfare and in this aspect of the struggle on the Eastern Front So much has been written on this subject and yet this book dispels myths and offers fresh insights in a study of Soviet and German tanks at the beginning of the war on the Eastern Front a fascinating selection of images Firetrench This book is highly recommended due to the excellent use of data the organization of the book established by the author and thoughtful and comprehensive coverage of the subject IPMS USA

M10 Tank Destroyer vs StuG III Assault Gun Steven J. Zaloga, 2013-08-20 The Allies M10 Tank Destroyer and the Germans Sturmgeschütz StuG III were the unsung workhorses of the northwest European battlefields of 1944-45 While their mission was not principally fighting one another their widespread use ensured their frequent encounters from the Normandy Bocage to the rubble strewn streets of Aachen The StuG III was the quintessential assault gun a low slung heavily armoured turretless vehicle intended to provide direct fire support for infantry formations whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer However by 1944 the 3in gun proved ineffectual against the most thickly armored German tanks and was consequently relegated to infantry support too Widely deployed in roles their designers had not envisaged these two armoured fighting vehicles clashed repeatedly during the 11 month campaign which saw the Allies advance from Normandy to the heart of the Reich Fully illustrated with specially commissioned artwork this is the story of their confrontation at the height of World War II Sturmgeschütze Bob Carruthers, 2013-06-05 An overview of the Wehrmacht's little known mobile assault guns designed to provide close infantry support against enemy field defenses in World War II The Sturmgeschütze rumbling forward into action is one of the iconic images of World War II As mobile assault guns the StuGs were essentially designed as infantry support weapons but they also proved themselves as highly effective tank destroyers Written by Emmy Award winning author Bob Carruthers this fascinating study encompasses the design development and combat history of the StuG II and IV Drawing on a variety of rare primary sources and photographs this outstanding study explains the role of the StuG in context and examines the combat records of the StuG aces such as Franz von Malachowski and Knight's Cross holder Oberwachtmeister Hugo Primozic of Stug Abt 667 Indispensable reading for anyone with an interest in armored warfare this book is part of the Hitler's War Machine series a new military history range compiled and edited by Emmy Award winning author and historian Bob Carruthers The series draws on primary sources and contemporary documents to provide a new insight into the true nature of Hitler's Wehrmacht **T-34 vs StuG III** Steven J. Zaloga, 2019-08-22 In the summer of 1944 the Red Army staged a massive armoured assault up the Karelian Isthmus with the

intent of eliminating any remaining German and Finnish forces facing the Leningrad region Most of the Soviet units sent into Finland were new to the region moving mainly from the fighting in the Leningrad area As a result some had the latest types of Soviet equipment including the new T 34 85 tank fielded alongside the older T 34 76 Germany refused to sell the Finns new tanks without a reinforced military alliance but in 1943 began selling them a few dozen StuG III assault guns This made the StuG III battalion the most modern and powerful element of the Finnish armoured division and it saw very extensive combat in the June July summer battles Featuring specially commissioned artwork and an array of archive photographs this is the absorbing story of the parts played by Soviet and Finnish armour in the epic battles in Finland during June and July 1944

Building Guderian's Duck: Germany's Response To The Eastern Front Antitank Crisis, 1941 To 1945 L-Commander Scott M. Chafian,2014-08-15 The appearance of the T 34 in 1941 caused a crisis for German antitank forces Existing antitank guns were nearly impotent against the new Russian tank while anti-aircraft and artillery pieces though successful when pressed into action were insufficiently mobile to accompany mechanized forces The German Army Ordnance Office the Heereswaffenamt was responsible for development of new weapons and would be responsible for countering the threat of Russian armor The Heereswaffenamt would need to not only counter the T 34 but also do so in an environment of shifting political relationships and with an increasingly stressed industrial system Utilizing lessons from the bitterly contested battlefields of western Russia the Heereswaffenamt developed a tank destroyer the Jagdpanzer IV using the existing chassis of the Panzer IV tank and the guns of both the Panzer IV and Panther tanks The Jagdpanzer IV known by its crews as Guderian's Duck proved to be a capable tank killer against both the T 34 threat of 1941 and 1942 as well as the improved versions of 1943 and 1944 **Stug III & Stug IV** Dennis Oliver,2019-03-30 A guide that blends the history behind this German World War II tank with resources for military vehicle modeling enthusiasts In the last years of the Second World War the Sturmgeschütz III StuG III and Sturmgeschütz IV StuG IV played a vital role as assault guns during the German army's struggle to block the Allied advance on the Western Front As the Wehrmacht's tank forces declined these armored vehicles were thrown into every defensive operation They are not as well known as the Tigers and Panthers but German resistance would have been much weaker without them They were also among the most frequently encountered German armored vehicles on the battlefields which is why they are such a fascinating subject for Dennis Oliver in this volume in the TankCraft series He uses archive photos and extensively researched color illustrations to examine the StuG III and StuG IV deployed by the German army and the Waffen SS during these doomed campaigns A key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of these historic armored vehicles **Weapons and Warfare** Spencer C. Hitler's Tank Killer Hans Seidler, 2010-08-19 Sturmgeschtz III was originally designed as an assault weapon but as war progressed it was increasingly used in a defensive role and evolved into an assault gun and tank destroyer By 1943 its main role was providing anti tank support to the units in its area of operation This consequently led to many StuGs being destroyed in battle Nonetheless they were very successful as tank killers and destroyed among others many bunkers pillboxes and other defenses While not considered to be a true tank because it lacked a turret the gun was mounded directly in the hull with a low profile to reduce vehicle heights and had a limited lateral traverse of a few degrees in either direction Thus the entire vehicle had to be turned in order to acquire targets Omitting the turret made production much simpler and less costly enabling greater numbers to be built Most assault guns were mounted on the chassis of a Panzer III or Panzer IV with the resultant model being called either a StuG III or StuG IV respectively The StuG was one of the most effective tracked vehicles of World War II and over 10 000 of them were eventually produced
