**Problems of Style** Alois Riegl,2018-12-04 Written at the height of the arts and crafts movement in fin de siecle Vienna Alois Riegl s Stilfragen represented a turning point in defining art and understanding the sources of its inspiration Demonstrating an uninterrupted continuity in the history of ornament from the ancient Egyptian through the Islamic period Riegl argued that the creative urge manifests itself in both great art and the most humble artifact and that change is an inherent part of style This new translation which renders Riegl s seminal work in contemporary readable prose allows for a fresh reexamination of his thought in light of current revisionist debate His discovery of infinite variation in the restatement of several decorative motifs the palmette rosette tendril led Riegl to believe that art is completely independent from exterior conditions and is beyond individual volition This thinking laid the groundwork for his famous concept of Kunstwollen or artistic intention Something that the translation will I hope convey is the passion invsted in Riegl s enterprise We are made to feel that the issues he discussed mattered vitally to him it was the very nature of art and its relation to human life that were at stake art as an absolute necessity From the preface of Henri Zerner Alois Reigl 1858 1905 was Curator of Textiles at the Museum of Art and Industry in Vienna during most of his career and wrote many influential works on the history of art including Spatromische Kunstgeschichte Evelyn Kain is Associate Professor of Art History at Ripon College Ripon Wisconsin David Castriota is Assistant Professor of Art History at Sarah Lawrence College Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the

H. Wright, 1992 The wealth of excavation in Cyprus conducted across a period of nearly a century and a half has revealed much evidence of ancient building of all functional categories This picture extends over a vast range of time ca 10 000 years since Cyprus is probably the place where the earliest substantial building known the Neolithic round house style is better presented than anywhere else in the world It is the aim of this book to set forth and document the building tradition which hitherto has received no detailed exposition The book will fill several gaps in the library shelves at one and the same time architectural history that presents all the archaeological evidence

*Ancient Building in Cyprus* G.R.H. Wright, 2022-11-07 The wealth of excavation in Cyprus conducted across a period of nearly a century and a half has revealed much evidence of ancient building of all functional categories Whereas the earlier excavation concerned mainly funerary and religious contexts more recent work has endeavoured to clarify the whole range of building in Cyprus This picture extends over a vast range of time ca 10 000 years since Cyprus is probably the place where the earliest substantial building known the Neolithic round house style is better presented than anywhere else in the world Certainly it was immeasurably longer lived in Cyprus than in any other region of the ancient world This longevity of tradition became a proverbial aspect of the Cypriote character It is the aim of this book to set forth and document this building tradition which hitherto has received no detailed exposition After preliminary geographical and historical introductions the ancient building of Cyprus has been surveyed and analysed from the following view points its historical development its design its construction and its foreign connections Because of the extensive and detailed coverage every effort has been made to facilitate the use of the book equally as a treatise and as a work of instant reference e g by way of introductory preface list of general references running titles to pages and marginal rubrics The book is also virtually a double treatment of the subject since a separate volume contains specially drawn illustrations arranged with captions on the facing pages which themselves constitute an incisive coverage of the subject matter The book will fill several gaps in the library shelves at one and the same time architectural history that presents all the archaeological evidence The print edition is available as a set of two volumes 9789004095472

**Art in Theory** Paul Wood, Leon Wainwright, Charles Harrison, 2020-12-11 A ground breaking new anthology in the Art in Theory series offering an examination of the changing relationships between the West and the wider world in the field of art and material culture

**Art in Theory The West in the World** is a ground breaking anthology that comprehensively examines the relationship of Western art to the art and material culture of the wider world Editors Paul Wood and Leon Wainwright have included 370 texts some of which appear in English for the first time The anthologized texts are presented in eight chronological parts which are then subdivided into key themes appropriate to each historical era The majority of the texts are representations of changing ideas about the cultures of the world by European artists and intellectuals but increasingly as the modern period develops and especially as colonialism is challenged a variety of dissenting voices begin to claim their space and a counter narrative to western hegemony develops Over half the book is devoted to 20th and 21st century materials though the book s unique selling point is the way it relates the modern globalization of art to much longer cultural histories As well as the anthologized material

**Art in Theory The West in the World** contains A general introduction discussing the scope of the collection Introductory essays to each of the eight parts outlining the main themes in their historical contexts Individual introductions to each text explaining how they relate to the wider theoretical and political currents of their time Intended for a wide audience the book is essential reading for students on courses in art and art history It will also be useful to specialists in the field of art history and readers with a general interest in the culture and politics of the modern world
