

Sub-Machine Guns and Automatic Rifles

WW2
FACT FILES

PETER CHAMBERLAIN and TERRY GANDER

World War 2 saw the emergence of the personal automatic weapon: the sub-machine gun and the automatic or assault rifle. These weapons enabled the individual foot soldier vastly to increase his available fire-power with the resultant changes in his tactics and battlefield role. In 1939 the full potential of the sub-machine gun had yet to be realised by many nations but Germany had ready the MP38 which was soon countered by the crude Sten Guns and the American M3 'Grease Gun'. Also in this Fact File are the notorious Thompson guns and the numerous Russian sub-machine guns. From the sub-machine gun concept grew the automatic rifle with its new range of ammunition specially produced for the new weapon that could fire single-shot or full automatic up to combat ranges and yet still light enough for the average infantryman to carry and use. Foremost among the new 'assault rifles' were the German StG 44 and FG 42, but Russian and other designs are covered. Also included in this Fact File is a section on flamethrowers.

Municipal Reference Library. Police Division, 1980 *Reports and Documents* United States. Congress, The Bofors Gun Terry Gander, 2013-04-30 The definitive history of this enduring and versatile anti aircraft weapon including many photos and drawings The 40mm Bofors gun first produced in the 1930s has become one of the most famous artillery pieces of all time It shows no sign of fading from the defense scene as in the second decade of the twenty first century it performs in many roles that were not contemplated by its original designers It has also proven to be so versatile that it is now allied to electronic and other technological marvels that were mere pipe dreams only a few years ago When the Bofors entered the international defense market its primary quarry the military aircraft was still a slow and fragile machine that could be terminally damaged by a single hit from a 40mm projectile Terry Gander describes this early period in the gun s development and he shows how despite recent increases in target speed and other performance parameters it can still inflict a one hit kill on almost any aircraft helicopter or guided missile Perhaps the most astonishing aspect of the story is that the fundamentals of today s Bofors guns remain virtually unchanged from the very first examples to

come off the Karlskoga production line in Sweden In all its forms the Bofors continues to be a sound reliable and lethal piece of military hardware that has given good service to gunners all over the world Terry Gander s comprehensive account of the history of this remarkable weapon over the course of almost eighty years is fascinating reading and an invaluable work of reference for military historians and artillery specialists alike **The Bookseller** ,1976 *Encyclopedia of Military Technology and Innovation* Stephen Bull,2004-06-30 From the Abrams M1 tank to the zeppelin this essential reference details the invention and evolution of nearly 600 of the most important advances in military technology from prehistory to the present International in scope it covers weapons ammunition defenses land vehicles aircraft ships detection stealth gear supplies weapons of mass destruction and much more Whether researching such cutting edge technologies as the B 2 Stealth Bomber Patriot Missile and the Roborator project or such historical topics as forts Molotov cocktails or the U 2 *Encyclopedia of Military Technology and Innovation* is a must have reference Warfare and national defense have provided a strong stimulus for technological advances throughout history This reference provides students and researchers from high school through college scholars and the general public essential information historical perspective and scientific context to understand better the development capabilities and uses of major military technologies Fifty illustrations helpful cross references a bibliography and an index help users navigate this reference and supplement their research
