The Subjective View Colin McGinn,1983 The Subjective View Colin McGinn,1983 *The Subjective View* Colin McGinn,1987 **Self-Experience** Manuel García-Carpintero,Marie Guillot,2023 Self Experience explores some of the questions running through the ongoing debate on the putative subjective dimension of experience surveys various domains of human experience where a sense of self might be at play and offers insights into the possible relations between the notions of subjective awareness involved Humean Nature Neil Sinhababu,2017 Neil Sinhababu defends the Humean Theory of Motivation according to which desire drives all human action and practical reasoning This theory helps us to understand core aspects of human nature such as intention the will moral belief emotion and the self and it has revolutionary consequences for ethics Welfare, Happiness, and Ethics L. W. Sumner,1996-09-26 Moral philosophers agree that welfare matters But they do not agree about what it is or how much it matters Wayne Sumner presents an original theory of welfare investigating its nature and discussing its importance He considers and rejects all notable rival theories both objective and subjective including hedonism and theories founded on desire or preference His own theory connects welfare closely with happiness or life satisfaction Professor Sumner then proceeds to defend welfarism that is to argue against the value pluralism that currently dominates moral philosophy that welfare is the only basic ethical value the only thing which we have a moral reason to promote for its own sake He concludes by discussing the implications of this thesis for ethical and political theory

Rediscovering Colors M. Watkins,2012-12-06 In *Rediscovering Colors A Study in Pollyanna Realism* Michael Watkins endorses the Moorean view that colors are simple non reducible properties of objects Consequently Watkins breaks from what has become the received view that either colors are reducible to certain properties of interest to science or else nothing is really colored What is novel about the work is that Watkins unlike other Mooreans takes seriously the metaphysics of colors Consequently Watkins provides an account of what colors are how they are related to the physical properties on which they supervene and how colors can be causally efficacious without the threat of causal overdetermination Along the way he provides novel accounts of normal conditions and non human color properties The book will be of interest to any metaphysician and philosopher of mind interested in colors and color perception **The Explainability of Experience** Ursula Renz,2018-07-02 This book reconstructs Spinoza s theory of the human mind against the backdrop of the twofold notion that subjective experience is explainable and that its successful explanation is of ethical relevance because it makes us wiser freer and happier *The Routledge Companion to Philosophy of Psychology* Sarah Robins,John Symons,Paco Calvo,2019-10-08 The *Routledge Companion to Philosophy of Psychology* Second Edition is an invaluable guide and major reference source to the key topics problems concepts and debates in philosophy of psychology and is the first companion of its kind A team of renowned international contributors provide forty eight chapters organized into six clear parts Historical background to philosophy of psychology Psychological explanation Cognition and representation The biological basis of

Metaphysics and Epistemology Stephen Hetherington, 2013-06-25 Metaphysics and Epistemology A Guided Anthology presents a comprehensive introductory overview of key themes thinkers and texts in metaphysics and epistemology Presents a wide ranging collection of carefully excerpted readings on metaphysics and epistemology Blends classic and contemporary works to reveal the historical development and present directions in the fields of metaphysics and epistemology Provides succinct insightful commentary to introduce the essence of each selection at the beginning of chapters which also serve to inter link the selected writings

Perception and Reason Bill Brewer, 1999-04-01 Bill Brewer sets out an original view of the role of conscious experience in the acquisition of empirical knowledge Most epistemology of perception takes a person's possession of beliefs about the mind independent world for granted and goes on to ask what further conditions these beliefs must meet if they are to be cases of knowledge Brewer argues that this approach is completely mistaken Perceptual experiences must provide reasons for empirical beliefs if there are to be any determinate beliefs at all about particular objects in the world The crucial epistemological role of experience lies in its essential contribution to the subject's understanding of certain perceptual demonstrative contents simply grasping which provides him with a reason to endorse them in belief Brewer explains in detail how this is so defends his position against a wide range of objections and compares and contrasts it with a number of influential alternative views in the area He brings out its connection with Russell's Principle of Acquaintance and examines its consequences for the compatibility of content externalism with an adequate account of self knowledge Perception and Reason offers a fresh approach to epistemology turning away from the search for necessary and sufficient conditions for knowledge and working instead from a theory of understanding in a particular area

[The Oxford Companion to Consciousness](#) Tim Bayne, Axel Cleeremans, Patrick Wilken, 2014-02-27 Consciousness is undoubtedly one of the last remaining scientific mysteries and hence one of the greatest contemporary scientific challenges How does the brain's activity result in the rich phenomenology that characterizes our waking life Are animals conscious Why did consciousness evolve

How does science proceed to answer such questions Can we define what consciousness is Can we measure it Can we use experimental results to further our understanding of disorders of consciousness such as those seen in schizophrenia delirium or altered states of consciousness These questions are at the heart of contemporary research in the domain Answering them requires a fundamentally interdisciplinary approach that engages not only philosophers but also neuroscientists and psychologists in a joint effort to develop novel approaches that reflect both the stunning recent advances in imaging methods as well as the continuing refinement of our concepts of consciousness In this light the Oxford Companion to Consciousness is the most complete authoritative survey of contemporary research on consciousness Five years in the making and including over 250 concise entries written by leaders in the field the volume covers both fundamental knowledge as well as more recent advances in this rapidly changing domain Structured as an easy to use dictionary and extensively cross referenced the Companion offers contributions from philosophy of mind to neuroscience from experimental psychology to clinical findings so reflecting the profoundly interdisciplinary nature of the domain Particular care has been taken to ensure that each of the entries is accessible to the general reader and that the overall volume represents a comprehensive snapshot of the contemporary study of consciousness The result is a unique compendium that will prove indispensable to anyone interested in consciousness from beginning students wishing to clarify a concept to professional consciousness researchers looking for the best characterization of a particular phenomenon

On the Genealogy of Color Zed Adams, 2015-10-16 In *On the Genealogy of Color* Zed Adams argues for a historicized approach to conceptual analysis by exploring the relevance of the history of color science for contemporary philosophical debates about color realism Adams contends that two prominent positions in these debates Cartesian anti realism and Oxford realism are both predicated on the assumption that the concept of color is ahistorical and unrevisable Adams takes issue with this premise by offering a philosophical genealogy of the concept of color This book makes a significant contribution to recent debates on philosophical methodology by demonstrating the efficacy of using the genealogical method to explore philosophical concepts and will appeal to philosophers of perception philosophers of mind and metaphysicians

Puzzles of Reference Herman Cappelen, Josh Dever, 2018-06-28 It is a fundamental feature of language that words refer to things Much attention has been devoted to the nature of reference both in philosophy and in linguistics *Puzzles of Reference* is the first book to give a comprehensive accessible survey of the fascinating work on this topic from the 1970s to the present day Written by two eminent philosophers of language *Puzzles of Reference* offers an up to date introduction to reference in philosophy and linguistics summarizing ideas such as Kripke's revolutionary theory and presenting the various challenges in a clear and accessible manner As the text does not assume prior training in philosophy or linguistics it is ideal for use as part of a philosophy of language course for philosophy students or for linguistics students *Puzzles of Reference* belongs to the series *Contemporary Introductions to Philosophy of Language* in which each book provides an introduction to an important area of the philosophy of language suitable for students at any

level *Self, Reason, and Freedom* Andrea Christofidou, 2013 Freedom and its internal relation to reason is fundamental to Descartes philosophy in general and to his Meditations on First Philosophy in particular Without freedom his entire enquiry would not get off the ground and without understanding the role of freedom in his work we could not understand what motivates key parts of his metaphysics Yet not only is freedom a relatively overlooked element but its internal relation to reason has gone unnoticed by most studies of his philosophy *Self Reason and Freedom A New Light on Descartes Metaphysics* by defending freedom's internal relation to reason sheds new light on Descartes metaphysics and restores the often dismissed Fourth Meditation to the core of his metaphysics as he conceived it Implicit in that relation is a rejection of any authority external to reason Andrea Christofidou shows how this lends strength and explanatory force to Descartes enquiry and reveals his conception of the unity of the self and of its place in the world *Self Reason and Freedom A New Light on Descartes Metaphysics* is essential reading for students and scholars of Descartes and anyone studying seventeenth century philosophy

Types Zemach, 2021-11-01 This book consists of a series of applications to ontology the philosophy of mind and aesthetics of two nominalistic theses first that all the things we encounter houses cats people symphonies and also hair milk red and love are types and second that things are ontologically incomplete Types are material things that recur at several indices at which they are identical with other things thus in this world Man Mortal and today Jane Happy The Jupiter Symphony is a material thing that recurs at various times at homes and concert halls Like all things it is ontologically incomplete it is undetermined with respect to some properties therefore it can be interpreted that it is identical with some things more complete than it is Using these ideas new simple and metaphysically frugal solutions are offered to a plethora of questions that have beset philosophy ever since Plato

What Minds Can Do Pierre Jacob, 1997-01-23 This 1997 book explores the representational powers of a person's mind

Propositional Attitudes Mark Richard, 1990-02-23 Beginning with a spirited defense of the view that propositions are structured and that propositional structure is psychologically real the author develops a subtle view of propositions and attitude ascription
