**Subjunctive Reasoning** J.L. Pollock, 2012-12-06 I am indebted to many people for the help they gave me in the writing of this book I owe a large debt to David Lewis and Robert Stalnaker on both general and specific grounds As becomes apparent from reading the notes the book would not have been possible without their pioneering work on subjunctive conditionals In addition both were kind enough to provide specific comments on earlier versions of different parts of the book and Stalnaker read and commented on the entire manuscript Closer to home I am indebted to my colleagues Rolf Eberle and Henry Kyburg Jr my erstwhile colleague Keith Lehrer and numerous graduate students for their helpful comments on various parts of the manuscript Some of the material contained herein appeared first in the form of journal articles and I wish to thank the journals in question for allowing the material to be reprinted here Chapter One contains material taken from The Possible Worlds Analysis of Counterfactuals published in Phil Studies 29 1976 469 Reidel Chapter Two contains material much revised from Four Kinds of Conditionals Am Phil Quarterly 12 1975 and Chapter Three contains much revised material from Subjunctive Generalizations Synthese 28 1974 199 Reidel CHAPTER I INTRODUCTION 1 SUBJUNCTIVE REASONING There exists quite a variety of statements which are in some sense subjunctive *Principles of Knowledge Representation and Reasoning* Bernhard Nebel, Charles Rich, William R. **Definition and Induction** Kisor Kumar Chakrabarti,1995-03-01

Definition is an important scientific and philosophical method In all kinds of scientific and philosophical inquiries definition is provided to make clear the characteristics of the things under investigation Definition in this sense sometimes called real definition should state the essence of the thing defined according to Aristotle In another currently popular sense sometimes called nominal definition definition explicates the meaning of a term already in use in an ordinary language or the scientific discourse or specifies the meaning of a new term introduced in an ordinary language of the scientific discourse Definition combines the purposes of both real and nominal definition and is promoted by the Nyaya philosophers of India Another important method of science and philosophy is induction In a narrow sense induction is a method of generalization to all cases from the observation of particular cases In a broad sense induction is a method for reasoning from some observed fact to a different fact not involved in the former We understand induction in the broad sense though more often we shall actually be concerned with induction in the narrow sense How can our limited experience of nature provide the rational basis for making knowledge claims about unobserved phenomena

Handbook of Philosophical Logic Dov M. Gabbay,Franz Guenther,2013-06-29 It is with great pleasure that we are presenting to the community the second edition of this extraordinary handbook It has been over 15 years since the publication of the first edition and there have been great changes in the landscape of philosophical logic since then The first edition has proved invaluable to generations of students and researchers in formal philosophy and language as well as to consumers of logic in many applied areas The main logic article in the Encyclopaedia Britannica 1999 has described the first edition as the best starting point for exploring any of the topics in logic We are confident that the second edition will prove to be just as good The first edition was the second handbook published for the logic community It followed the North Holland one volume Handbook of Mathematical Logic published in 1977 edited by the late Jon Barwise The four volume Handbook of Philosophical Logic published 1983 1989 came at a fortunate temporal junction at the evolution of logic This was the time when logic was gaining ground in computer science and artificial intelligence circles These areas were under increasing commercial pressure to provide devices which help and/or replace the human in his daily activity This pressure required the use of logic in the modelling of human activity and organisation on the one hand and to provide the theoretical basis for the

computer program constructs on the other
