Brown,2019 This Handbook s content provides a definitive overview of the research knowledge base for adolescent substance abuse the most significant social problem of adolescence Its contributors are leading researchers in their fields making the volume unique in the breadth as well as depth of its coverage Topics covered range from basic neuroscience to genetics to behavioral precursors and correlates to social relationships to cultural variation to clinical correlates to social policy The Handbook s comprehensive scope and the depth of its analysis make it suitable both as a text for graduate level courses as well as a core reference for professionals in the field *Child and Adolescent Behavioral Health* Edilma L. Yearwood,Geraldine S. Pearson,Jamesetta A. Newland,2012-01-18 As an increasing number of children and adolescents with psychiatric symptoms go unrecognized in our current healthcare system the ability to identify and treat these issues in multiple healthcare settings has become vitally important With access to primary care providers increasing and a shortage of child psychiatric providers collaboration between psychiatric pediatric and family advanced practice nurses is essential to improving care for this vulnerable population *Child and Adolescent Behavioral Health* provides a practical reference to aid in this endeavour Written and reviewed by over 70 nurse experts it is a must have reference for all practitioners caring for children and adolescents **Caregiver Substance Use and Child Trauma** Michele Staton-Tindall,Ginny Sprang,Lala Straussner,2016-03-16 Research has consistently shown that there is a link between caregiver substance use and child maltreatment but less attention has been given to child trauma exposure The co occurrence of caregiver substance misuse and child trauma exposure is a prevailing problem that has confounded social work prevention protection and treatment efforts with both children and adults for years However there has been minimal empirical and clinical literature focusing on child trauma as an outcome of caregiver substance use This work is designed to be the catalyst for sustained intellectual inquiry about how caregiver substance use child maltreatment and violence exposure can be understood in theory and practice To this end the research presented in this book highlights the state of the science the impact of the phenomenon and

the policy and practice questions that must be addressed Implications for social work practice are highlighted in order to attenuate these deleterious and pervasive problems in the future This book was originally published as a special issue of the Journal of Social Work Practice in the Addictions Child, Adolescent and Family Refugee Mental Health Suzan J. Song, Peter Ventevogel, 2020-06-15 More than half of the 25.9 million refugees in the world are under the age of 18 and the mental health of these children and adolescents constitutes a growing global public health priority Refugee children and their families are at increased risk to develop mental health problems but they often face major challenges in accessing adequate treatment and mental health professionals frequently feel ill equipped to assist this group Refugees are faced with a plethora of issues including the ambiguous loss of loved ones psychological trauma related to past experiences of violence and atrocities the complexities of daily life as a refugee and the challenges to adapt to new systems of care and support Refugees life circumstances all too often undermine their agency as they face discrimination stigma and social isolation or exclusion Refugees are frequently disconnected from the usual family and community supports that they once had which creates additional mental distress As parents struggle with these changes their children often find it even more difficult to adapt and connect with them This all leads to increased prevalence of mental health conditions among refugees Humanitarian policies recommend family centered interventions that are multi sectoral multi disciplinary and focus on optimizing resource utilization Over the last decade a considerable body of research has emerged around socio ecological models of mental health family and community approaches and resilience and strengths based theories but these insights are insufficiently incorporated in the practice of mental health care for refugee children Clinicians often struggle to grasp the common unique stressors that families face and are not familiar with working with families as units for intervention Using culturally and contextually informed assessment methods and family oriented management approaches not only help individual children or adolescents but also their families This book aims to provide an overview of the latest theoretical insights from research on sociocultural aspects of mental health and connect these with clinical insights from practical mental health care provision Using strengths based resiliency oriented and family centered approaches can enrich clinical practice in refugee mental health but clinicians need to translate the emerging evidence into concrete steps and interventions This requires additional skills for the assessment and management of mental health conditions in refugee children and families The chapters in this book are written by a diverse group of authors using global multi disciplinary approaches The chapters provide examples from various contexts including refugees who are displaced to neighboring countries refugees on the move and refugees and asylum seekers in resettlement settings This book is therefore a unique resource for clinicians researchers and policy makers working on mental health issues of refugee children and adolescents around the world *Specialty Competencies in Clinical Child and Adolescent Psychology*, 2012-02-03 In this volume the authors provide a comprehensive demonstration of the competencies involved in clinical child psychology offering an
