Analog Circuit Design

Rudy J. van de Plassche, Johan Huijsing, Willy M.C. Sansen, 2013-03-09 This book contains the extended and revised editions of all the talks of the ninth AACD Workshop held in Hotel Bachmair April 11-13 2000 in Rottach Egem Germany. The local organization was managed by Rudolf Koch of Infineon Technologies AG Munich Germany. The program consisted of six tutorials per day during three days. Experts in the field presented these tutorials and state of the art information is communicated. The audience at the end of the workshop selects program topics for the following workshop. The program committee consisting of Johan Huijsing of Delft University of Technology, Willy Sansen of Katholieke Universiteit Leuven and Rudy van de Plassche of Broadcom Netherlands BV Bunnik elaborates the selected topics into a three day program and selects experts in the field for presentation. Each AACD Workshop has given rise to publication of a book by Kluwer entitled Analog Circuit Design. A series of nine books in a row provides valuable information and good overviews of all analog circuit techniques concerning design, CAD simulation and device modeling. These books can be seen as a reference to those people involved in analog and mixed signal design. The aim of the workshop is to brainstorm on new and valuable design ideas in the area of analog circuit design. It is the hope of the program committee that this ninth book continues the tradition of emerging contributions to the design of analog and mixed signal systems in Europe and the rest of the world.
