Suburb In The City:

Suburb in the City David R. Contosta, 1992 In *Suburb in the City* David Contosta tells the story of how Chestnut Hill Pennsylvania once a small milling and farming town evolved to become both a suburban enclave for wealthy Philadelphians and a part of the city itself In 1854 the railroad connected Philadelphia and Chestnut Hill and the village was annexed by the city Attuned to the romantic currents of the age the wealthy men and women who moved to Chestnut Hill believed that the village's semi rural surroundings might uplift them physically spiritually emotionally and morally At the same time they wanted to continue to enjoy the best that the city had to offer while escaping from its more unpleasant aspects dirt crime disease and other shortcomings They thus cultivated a dual identity with both suburb and city Ironically this led to a sense of division as prosperous suburbanites held themselves aloof from the resident shopkeepers and domestic servants who provided so many of their creature comforts Being a suburb in the city also meant that Chestnut Hill could not control its political destiny as communities outside the municipal limits could In response residents developed a number of civic organizations that became a sort of quasi government Contosta's study of Chestnut Hill thus illuminates the divided and often ambivalent feelings that Americans hold about their great cities He includes anecdotes gleaned from dozens of interviews with men and women of many backgrounds lawyers nuns debutantes grocers craftsmen and former servants who tell of their lives in Chestnut Hill More than one hundred photographs many never before published further enliven this analysis of suburban America

City Suburbs Alan Mace, 2013 The majority of the world's population is now urban and for most this will mean a life lived in the suburbs *City Suburbs* considers contemporary Anglo American suburbia drawing on research in outer London

it looks at life on the edge of a world city from the perspective of residents Interpreted through Bourdieu's theory of practice it argues that the contemporary suburban life is one where place and participation are in combination strong determinants of the suburban experience From this perspective suburbia is better seen as a process an on going practice of the suburban which is influenced but not determined by the history of suburban development How residents engage with the city and the legacy of particular places combine powerfully to produce very different experiences across outer London In some cases suburban residents are able to combine the benefits of the city and their residential location to their advantage but in marginal middle class areas the relationship with the city is more circumspect as the city represents more threat than opportunity The importance of this relational experience with the city informs a call to integrate more fully the suburbs into studies of the city

North-American Review and Miscellaneous Journal ,1893 **The State of the Cities** ,2000 The State of the Cities ,1999 ,1999 State of the Cities -- 1999 , Sequel to Suburbia Nicholas A. Phelps,2015-11-20 How the decentralized automobile oriented and fuel consuming model of American suburban development might change In the years after World War II a distinctly American model for suburban development emerged The expansive rings of outer suburbs that formed around major cities were decentralized and automobile oriented an embodiment of America s postwar mass production mass consumption economy But alternate models for suburbia including transit oriented development smart growth and New Urbanism have inspired critiques of suburbanization and experiments in post suburban ways of living In Sequel to Suburbia Nicholas Phelps considers the possible post suburban future offering historical and theoretical context as well as case studies of transforming communities Phelps first locates these outer suburban rings within wider metropolitan spaces describes the suburbs as a spatial fix for the postwar capitalist economy and examines the political and governmental obstacles to reworking suburban space He then presents three glimpses of post suburban America looking at Kendall Dadeland in Miami Dade County Florida Tysons Corner in Fairfax County Virginia and Schaumburg Illinois near Chicago He shows Kendall Dadeland to be an isolated New Urbanism success describes the re planning of Tysons Corner to include a retrofitted central downtown area and examines Schaumburg s position as a regional capital for Chicago s northwest suburbs As these cases show the reworking of suburban space and the accompanying political process will not be left to a small group of architects planners and politicians Post suburban politics will have to command the approval of the residents of suburbia

International Perspectives on Suburbanization N. Phelps,F. Wu,2011-09-13 New urban developments such as office blocks warehouses and retail complexes are increasingly common in outer city regions across the world This book examines the processes of post suburbanization in international perspective exploring how developments across the world might be considered post suburban

Interplaces Nicholas A. Phelps,2017 Much of the world s economic activity takes place in between cities and nations the geographical containers that we have taken for granted for hundreds of years now In this book Nicholas Phelps provides a guide to this uncharted territory within urban and economic geography He highlights the importance of intermediary actors and processes in shaping this economy in between From the airports shopping malls and office parks that have sprung up on the road between cities to work done on the move in cars and trains to the decisions made by internationally mobile networks of experts in conferences and negotiations The geography of the economy in between is revealed as one involving four recurring and coexisting economic geographical formations the agglomeration the enclave the

Ecologies of Affect Tonya K. Davidson,Ondine Park,Rob Shields,2013-06-01 *Ecologies of Affect* offers a synthetic introduction to the felt dynamics of cities and the character of places The contributors capture the significance of affects including desire nostalgia memory and hope in forming the identity and tone of places The critical intervention this collection of essays makes is an active consistent engagement with the virtualities that produce and refract our idealized attachments to place Contributors show how place images and attempts to build communities are rather than abstractions fundamentally tied to and revolve around such intangibles We understand nostalgia desire and hope as virtual that is even though they are not material they are nevertheless real and must be accounted for In this book the authors take up affect emotion and emplacement and consider them in relation to one another and how they work to produce and are produced by certain temporal and spatial dimensions The aim of the book is to inspire readers to consider space and place beyond their material properties and attend to the imaginary places and ideals that underpin and produce material places and social spaces This collection will be useful to practitioners and students seeking to understand the power of affect and the importance of virtualities within contemporary societies where intangible goods have taken on an increasing value
