**Ecological Entanglements in the Anthropocene** Nicholas Holm, Sy Taffel, 2016-12-21 This edited collection explores the relationships between humans and nature at a time when the traditional sense of separation between human cultures and a natural wilderness is being eroded The Anthropocene whose literal translation is the Age of Man is one way of marking these planetary changes to the Earth system Global climate change and rising sea levels are two prominent examples of how nature can no longer be simply thought of as something outside and removed from humans and vice versa This collection applies the concepts of ecology and entanglement to address pressing political social and cultural issues surrounding human relationships with the nonhuman world in terms of working with nature It asks are there more or less preferable ways of working with nature What forms and practices might this work take and how do we distinguish between them Is the idea of nature even sufficient to approach such questions or do we need to reconsider using the term nature in favour of terms such as environments ecologies or the broad notion of the non human world How might we forge perspectives and enact practices which build resilience and community across species and spaces constructing relationships with nonhumans which go beyond discourses of pollution degradation and destruction Bringing together a range of contributors from across multiple academic disciplines activists and artists this book examines how these questions might help us understand and assess the different ways in which humans transform engage and interact with the nonhuman world

**Gated Communities** Rowland Atkinson, Sarah Blandy, 2013-09-13 This informative volume gathers contemporary accounts of the growth influences on and impacts of so called gated communities developments with walls gates guards and other forms of surveillance While gated communities have become a common feature of the urban landscape in South Africa Latin and North America it is also clear that there is now significant interest in gated living in the European and East Asian urban context The chapters in this book investigate issues and communities such as gated communities in the metropolitan area of Buenos Aires Argentina planning responses to gated communities in Canada who segregates whom The analysis of a gated community in Mendoza Argentina sprawl and social segregation in southern California These illustrative chapters enable the reader to understand more about the social and

**A Comparative Political Ecology of Exurbia** Laura E. Taylor, Patrick T. Hurley, 2016-05-26 This book is about politics and planning outside of cities where urban political economy and planning theories do not account for the resilience of places that are no longer rural and where local communities work hard to keep from ever becoming urban By examining exurbia as a type of place that is no longer simply rural or only tied to the economies of global resources e g mining forestry and agriculture we explore how changing landscapes are planned and designed not to be urban that is to look function and feel different from cities and suburbs in spite of new home development and real estate speculation The book's authors contend that exurbia is defined by the persistence of rural economies the conservation of rural character and protection of natural ecological systems all of which are critical components of the contentious local politics that seek to limit growth Comparative political ecology is used as an organizing concept throughout the book to describe the nature of exurban areas in the U S and Australia although exurbs are common to many countries The essays each describe distinctive case studies with each chapter using the key concepts of competing rural capitalisms and uneven environmental management to describe the politics of exurban change This systematic analysis makes the processes of exurban change easier to see and understand Based on these case studies seven characteristics of exurban places are identified rural character access local economic change ideologies of nature changes in land management coalition building and land use planning This book will be of interest to those who study planning conservation and land development issues especially in areas of high natural amenity or environmental value There is no political ecology book quite like this neither one solely focused on cases from the developed world in this case the United States and Australia nor one that specifically harnesses different case studies from multiple areas to develop a central organizing perspective of landscape change

**The Working Landscape** Peter F. Cannavo, 2007-06-22 In America today we see rampant development unsustainable resource exploitation and commodification ruin both natural and built landscapes disconnecting us from our surroundings and threatening our fundamental sense of place Meanwhile preservationists often respond with a counterproductive stance that rejects virtually any change in the landscape In *The Working Landscape* Peter Cannav identifies this zero sum conflict between development and preservation as a major factor behind our contemporary crisis of place Cannav offers practical and theoretical alternatives to this deadlocked polarized politics of place by proposing an approach that embraces both change and stability and unifies democratic and ecological values creating a working landscape Place Cannav argues is not just an object but an essential human practice that involves the physical and conceptual organization of our surroundings into a coherent enduring landscape This practice must balance development which he calls founding and preservation Three case studies illustrate the polarizing development preservation conflict the debate over the logging of old growth forests in the Pacific Northwest the

problem of urban sprawl and the redevelopment of the former site of the World Trade Center in New York City Cannav suggests that regional democratic governance is the best framework for integrating development and preservation and he presents specific policy recommendations that aim to create a working landscape in rural suburban and urban areas A postscript on the mass exile displacement and homelessness caused by Hurricane Katrina considers the implications of future climate change for the practice of place

**Between Dream Houses and "God's Own Junkyard": Architecture and the Built Environment in American Suburban Fiction** Stefanie Strebel, 2021-06-28 The American suburb is a space dominated by architectural mass production sprawl as well as a monotonous aesthetic eclecticism and many critics argue

that it has developed from a postwar utopia into a disorienting environment with which it is difficult to identify The typical suburb has come to display characteristics of an atopia that is a space without borders or even a non place a generic space of transience Dealing with the representation of architecture and the built environment in suburban literature and film from the 1920s until present this study demonstrates that in its fictional representations too suburbia has largely turned into a place of non architecture A lack of architectural ethos and an abundance of Junkspace define suburban narratives causing an increasing sense of disorientation and entropy in fictional characters

*The Planner's Guide to Natural Resource*

*Conservation:* Adrian X. Esparza, Guy McPherson, 2009-06-12 Much of the country's recent population growth is situated in exurban areas By many accounts exurbanization has become the dominant pattern of land development in the country and there is no indication it will slow in the foreseeable future Theobald 2005 Brown et al 2005 Glennon and Kretser 2005 By definition exurban development takes place beyond the metropolitan fringe often in rural and remote areas The development of new exurban communities is a growing trend especially in the West In this case developers and homebuilders seek large tracts of land up to thousands of acres in rural areas typically within 50 miles of a large city where they plan entire communities consisting of commercial retail and residential land uses Recreational amenities such as golf courses and hiking biking trails are often included in these master planned developments Our philosophy is reflected in the book's two objectives First we seek to document the extent and impacts of exurban development across the country At issue is demonstrating why planners and the public at large should be concerned about exurbanization We will demonstrate that even though exurbanization favors amenity rich regions it affects all areas of the country through the loss of agricultural and grazing lands impacts to watersheds and land modification A summary of environmental impacts is presented including the loss of wildlands and agricultural productivity land modification soil erosion impacts to terrestrial hydrologic systems the loss of biodiversity nonnative and endangered species and other topics Our second aim is to provide readers from diverse nonscientific backgrounds with a working knowledge of how and why exurbanization impacts environmental systems This is accomplished by working closely to ensure contributors follow a specific outline for each chapter First contributors will spell out fundamental concepts principles and processes that apply to their area of expertise e.g. riparian areas Contributors will move beyond a cursory understanding of ecological processes without overwhelming readers with the dense material found typically in specialized texts For this reason visuals and other support materials will be integral to each chapter We have chosen contributors carefully based on their record as research scientists and acumen as educators Second once the mechanics have been laid out authors will explain how and why land development in nearby areas influences ecosystems Issues of interdependency modification and adaptation spatial scale and varying time horizons will be featured Third contributors will weigh in on the pros and cons of various land development schemes Fourth authors will share their thinking on the merits of conservation devices such as wildlife corridors open space requirements and watershed management

districts Finally each chapter will conclude by identifying pitfalls to avoid and highlighting best practices that will mitigate environmental problems or avoid them altogether In sum after completing each chapter readers should have a firm grasp of relevant concepts and processes an understanding of current research and know how to apply science to land use decisions

Research in Urban Sociology Mark Clapson, Ray Hutchison, 2010-12-14 Presents contributions in comparative suburban studies for urban regions not just in Europe and the United States but also metropolitan regions in China India and other areas of the world This title examines the patterns of suburban development in metropolitan regions around the globe

**Rural Housing, Exurbanization, and Amenity-Driven Development** Mark Lapping, 2016-04-15 Rural America is progressing through a dramatic and sustained post industrial economic transition For many traditional means of household sustenance gained through agriculture mining and rustic tourism are giving way to large scale corporate agriculture footloose and globally competitive manufacturing firms and mass tourism on an unprecedented scale These changes have brought about an increased presence of affluent amenity migrants and returnees as well as growing reliance on low wage seasonal jobs to sustain rural household incomes This book argues that the character of rural housing reflects this transition and examines this using contemporary concepts of exurbanization rural amenity based development and comparative distributional descriptions of the haves and the have nots Despite rapid in migration and dramatic changes in land use there remains a strong tendency for communities in rural America to maintain the idyllic small town myth of large lot single family home ownership This neglects to take into account the growing need for affordable housing both owner occupied and rental properties for local residents and seasonal workers This book suggests that greater emphasis be placed in rural housing policies that account for this rapid social and economic change and the need for affordable rural housing alternatives

**The Political Culture of the New West** Jeff Roche, 2008-10-28 From wildcatting Texas oilmen to Colorado rock climbers from hipster capitalists to populist moralizers westerners have proven themselves to be a highly individualistic breed of American as much in their politics as in their vocations or lifestyles This first book on the landscape of the American West s politics looks beyond red state blue state assumptions to explore how westerners have expanded the boundaries of the political and emerged as a harbinger of America s electoral future Representing a wide range of specialties popular culture business history the environment ethnic history agriculture and more these authors portray a politically heterogeneous region and show how its multiple traditions have strongly shaped the nation s body politic Viewing politics as more than cyclical electioneering they draw on historical evidence to portray westerners imaginatively rethinking democratic practice and constantly forging new political publics These twelve essays move western political history beyond the usual discussions of elections and parties and the standard issues of water progressivism and states rights Some explore claims to western authenticity among those associated with western conservatism not just regional heroes like Barry Goldwater and Ronald Reagan but farmers and evangelicals as well Others examine the transformation of the West s minority communities to reveal

a liberalism that celebrates diversity and articulates claims for social justice The final chapters reveal the complexity of contemporary western political culture challenging longstanding assumptions about such notions as space nature and the liberal conservative divide Here then is the paradox of western politics in all its enigmatic glory with frontier individualism going head to head with multiethnic diversity in debates over divergent views of western authenticity and wild cards put into play by counterculturists cyber libertarians fiscally conservative gun toting Democrats and environmentalists The Political Culture of the New West shows how westerners have expressed themselves within a complex often contradictory and constantly changing political culture and helps explain why no electoral outcome in this part of America can be predicted for certain

**Marxism and Real Estate Development** Julian Roche, 2023-09-01 This book straddles two worlds and attempts to bring them together that of Lefebvre s Marxism on the one hand and that of real estate development on the other Lefebvre has now become a household name amongst many contemporary Marxists especially those with an interest in urban planning and certain quarters of the architectural profession however his work is far less well known by real estate professionals whether investors developers brokers or indeed policymakers Marxism and Real Estate Taking Lefebvre Seriously has both a large scope and a very bold aim to use an explication and analysis of the work of Henri Lefebvre not only to present a critique of development but also to draw these two worlds together It therefore first aims to present the arguments of this increasingly well known French Marxist philosopher sociologist and pioneer of urban studies second to situate contemporary real estate development in the light of Lefebvre s work and third to analyse the potential application of Lefebvre s work to each of the major components of contemporary real estate to use Lefebvre s work in order to recommend practical action for developers working alongside planners and architects to influence the future of global real estate As well as its direction at developers themselves this book should be of interest to economists real estate researchers and professionals planners urban studies scholars and of course to those interested in the application of Lefebvre s work to real estate

**The Power of Culture in City Planning** Tom Borrup,2020-11-29 The Power of Culture in City Planning focuses on human diversity strengths needs and ways of living together in geographic communities The book turns attention to the anthropological definition of culture encouraging planners in both urban and cultural planning to focus on characteristics of humanity in all their variety It calls for a paradigm shift re positioning city planners base maps to start with a richer understanding of human cultures Borrup argues for cultural master plans in parallel to transportation housing parks and other specialized plans while also changing the approach of city comprehensive planning to put people or users first rather than land uses as does the dominant practice Cultural plans as currently conceived are not sufficient to help cities keep pace with dizzying impacts of globalization immigration and rapidly changing cultural interests Cultural planners need to up their game and enriching their own and city planners cultural competencies is only one step Both planning practices have much to learn from one another and already overlap in more ways than most recognize This book highlights some of the strengths of the lesser known practice of cultural planning to help forge greater understanding and collaboration between the two practices empowering city planners with new tools to bring about more equitable communities This will be an important resource for students teachers and practitioners of city and cultural planning as well as municipal policymakers of all stripes
