Solomon, 2017-10-24 In *Evangelical Christian Executives* Dr Solomon has captured the essence of an effective and refreshingly different approach to business In telling the compelling stories of six Christian CEOs he shows us an alternative to an ethic of greed that has so tarnished corporate America John D Beckett CEO and Chairman of R W Beckett Corp Events of recent years have encouraged a high degree of skepticism and doubt about business institutions and markets In the face of widespread cynicism about corporate credibility business leaders are seeking to restore the trust and confidence not only of investors but of employees customers suppliers shareholders potential investors and the public at large In this volume Lewis D Solomon focuses on evangelical Christians who have founded or come to lead six firms He

explores whether religion offers a constructive way to think about corporate governance and the tensions between profitability and social responsibility Solomon finds that many Christian executives have a private faith leading quietly by example Others want their faith to shine forth Solomon focuses on this latter group dividing them into two categories The first group he identifies as preachers who weave visible demonstrations of their faith into the fabric of their businesses The second are those who take a more sophisticated approach based on two biblical principles stewardship and or servant leadership In addition to examining how these leaders of faith have successfully brought their religious values into their businesses he assesses the consequences of incorporating their faith and values into their business organizations considering profitability employee and customer satisfaction legal and environmental compliance and charitable giving Together with these leadership styles and results Solomon presents three business models constant transformational and evolving that enable readers to gain a further understanding of the six companies While Solomon shows that it is possible to integrate financial profitability and broader religious goals he finds that it is difficult though not impossible to maintain a biblically based leadership style after a firm goes public or expands With the growth of evangelical Christianity in many sectors of American public life this volume will be of broad interest to business executives sociologists students of religion and economists Lewis D Solomon is Theodore Rinehart Professor of Business Law at the George Washington University Law School where he has taught corporate and tax law for over twenty five years A prolific author on legal business public policy and religious topics he has written over fifty books and numerous articles He is an ordained rabbi and interfaith minister
