Saudi Family-Owned Businesses: Generational Survival Cesar Chalhoub, 2025-02-27

Saudi Family Owned Businesses: Generational Survival explores the intricate dynamics of family owned businesses (FOBs) within the Kingdom of Saudi Arabia, a critical pillar of the global economy. While FOBs contribute over 70% of the global GDP and employ more than half the global workforce, they face unique challenges, particularly in achieving generational continuity. Only 30% of FOBs survive into the second generation, with rates plummeting to 12% by the third and less than 5% beyond the fourth. This book addresses these challenges, offering actionable insights based on robust frameworks like Professor John Davis's Three Circle Model and the Family Enterprise Sustainability Framework. It emphasizes the need for institutionalization, a structured transformation process designed to safeguard family legacies while enhancing governance, leadership, and strategic alignment. Through detailed case analyses of Saudi FOBs, the book presents a step-by-step institutionalization plan. It begins by laying a solid foundation rooted in shared vision and values, progresses to building governance capacity and engagement, and culminates in designing and implementing robust governance structures. Key practices, including family councils, succession planning, and performance metrics, are explored to ensure continuity and adaptability in a rapidly evolving business landscape. The book is an essential guide for families seeking to transform their enterprises into resilient, future-ready institutions and a useful reference for researchers and students of family owned businesses, entrepreneurship, and the economies of the Middle East.

Handbook of Research on the Strategic Management of Family Businesses Palma-Ruiz, Jesús Manuel, Barros-Contreras, Ismael, Gnan, Luca, 2020-01-10

The literature on family business has developed significantly over the last years. However, efforts remain to summarize and systematize the main aspects that affect the behavior of this type of company. In this regard, the topic of strategic management has been developed. In this sense, it is especially important to recognize how the family decisively influences the behavior of the company and also to identify how the existence of the company affects family dynamics. Those who manage family businesses, whether family or not, must reconcile both perspectives: business and family, in the definition of strategic objectives, allowing sustainability and continuity in this type of organization. The Handbook of Research on the Strategic Management of Family Businesses provides emerging research that covers how strategic management in the family business has been developed and identifies the objectives that sustain this strategic behavior. The main areas of analysis are family and business, the definition of strategies and their implementation. Also, the authors of this book review the different scenarios for family firms and propose strategies to tackle the challenges and seize the possibilities to grow in a competitive and dynamic environment. creates a system potentially fraught with confusion and conflict The significant rise in immigrant family businesses adds a further level of complexity to this mix Research into immigrant family businesses has been based on traditional limited views of entrepreneurship largely ignoring the ethnic and family contexts that create the culture from which entrepreneurship emerges making it impossible to understand the complex and interdependent relationships between an owning family its firm its governance and the community context in which the firm operates These firms possess features that make their governance a challenging task They depict a complex stakeholder structure whereby the ownership stakes are passed from one generation to the next The owning family s members usually play multiple roles thereby blurring governance relationships Governance in Immigrant Family Businesses explores the relationship between ethnic cultural influence in family businesses and its impact on corporate governance addressing the intertwined influences of contractual relational and cultural governance mechanisms and sets out a comprehensive theoretical model which clarifies the complexities involved in business planning family harmony and ethnic cultural variables The authors specifically identify the implications for research education and practice Application of their model will be of value to policy makers consultants business researchers and educators
