Money & Markets Dave Harder,Janice Dorn,2014-10 After losing much of his money when the South Sea Bubble burst in
1720 English physicist and mathematician Isaac Newton stated I can calculate the motion of heavenly bodies but not the
madness of people Even though Isaac Newton was a brilliant man he did not realize that markets function in a way that is
opposite to almost everything else we do For example if people are lining up around the block to purchase an iPad it is a sign
that it is a good product If people are lining up around the block to buy a condominium it is a bad sign for real estate Markets
do not always act in a rational or logical manner Mind Money Markets explains why they act the way they do It is critical for
every person to understand this in order to make wise decisions ranging from buying a home to operating a business Expert
advice is much less reliable than we expect it to be because no one can accurately predict the future on a consistent basis
Gigantic losses like the 6 2 billion trading loss at JP Morgan in 2012 show that investors are not giving momentum following
the trend the respect it deserves Mind Money Markets offers a momentum filter specifically a screening tool from which
every individual and professional investor should benefit The book also provides a circuit breaker that enables investors to
limit losses in case of an unexpected event in financial markets Using powerful and poignant analogies from their life
experiences including Dave Harder s twelve years as a Search and Rescue volunteer we provide readers with a simple
discipline to preserve precious hard earned capital during severe downturns and to outperform benchmarks when markets
are in an uptrend It is easier to know what to do than to actually do it Psychiatrist Dr Janice Dorn specializes in helping
traders and investors deal with emotions and aspects of human nature that hinder them from making astute investment
decisions for stocks bonds real estate currencies or commodities We have passed on many words of wisdom collected from
market sages and great thinkers We also highlight some major misconceptions about investing and show the reader how to
overcome them and prosper With a compelling mixture of fascinating stories and more than 100 colored charts and
photographs this is truly a unique work about how human beings react to markets The book helps individual as well as

professional investors to be efficient with their time and energy by teaching them to focus only on a few factors which have the most significant impact on financial markets The personalized strategies provided in these pages will enable readers to maximize gains minimize losses and have more time to spend on things that matter the most in their lives **Mutual Funds**
