Successful Rfps In Construction Managing The Request For Proposal Process:

Successful RFPs in Construction Richard Fria, 2005-04-08 The negotiated contract method for RFPs is a rapidly growing trend in construction. Traditionally RFPs have gone through a competitive bid method meaning that 100% of the design work is done without the input of contractors and with very little real cost information. With the negotiated contract method only about 10% of the design work is done before a contractor is brought to the table which means less paperwork and lower up front costs. There are several advantages to the negotiated contract method. Because only a small part of the design work is done up front before a contractor is brought on board no extensive re design work has to be done when budget schedule issues with the design become a factor. A complete team architect designer and contractor is assembled earlier making for a much more efficient process and outcome. The RFP process becomes a collaborative effort rather than a competitive one. There is no other book on the shelf that either focuses specifically on RFPs in the construction industry or features a step by step method for implementing the negotiated contract method. This is a step by step guide for managing the RFP process in a way that saves time money enhances team collaboration and assures quality in construction. Focusing on the negotiated contract method as opposed to the competitive bid method the book takes readers from articulating the needs wish list for a construction project to the analysis of responses and interviews through negotiations and finalization of the deal. This is a roadmap for Preparing understanding and assessing the quality of information in an RFP. Gathering critical project specific information from free and up to date local databases. Adding value to the process by assisting consultants in marketing and project management capabilities. Selecting and working with a team early in the process to stay on schedule and on budget. Improving the materials selection process and the end result overall quality of construction. Example and template forms make it easy to create a successful RFP process. *Writing RFPs for Acquisitions* Frances C. Wilkinson, Linda K. Lewis, 2008 Construction Process Planning and Management Sidney M Levy, 2009-09-24 By their very nature construction projects can create seemingly endless opportunities for conflict.
