**Success and Failure of Countries at the Olympic Games** Danyel Reiche, 2016-07-01 The Olympic Games is undoubtedly the greatest sporting event in the world with over 200 countries competing for success This important new study of the Olympics investigates why some countries are more successful than others Which factors determine their failure or success What is the relationship between these factors And how can these factors be manipulated to influence a country's performance in sport This book addresses these questions and discusses the theoretical concepts that explain why national sporting success has become a policy priority around the globe Danyel Reiche reassesses our understanding of success in sport and challenges the conventional explanations that population size and economic strength are the main determinants for a country's Olympic achievements He

presents a theory of countries success and failure based on detailed investigations of the relationships between a wide variety of factors that influence a country s position in the Olympic medals table including geography ideology policies such as focusing on medal promising sports home advantage and the promotion of women This book fills a long standing gap in literature on the Olympics and will provide valuable insights for all students scholars policy makers and journalists interested in the Olympic Games and the wider relationship between sport politics and nationalism **Sailing Craft** Edwin J.

Schoettle,1928 **Sailing** Dave Franzel,2018-01-15 Quickly and easily master the sailing fundamentals you ll need to get out on the water MotorBoating ,1972-07 The Sailing Mind Roberto Casati,2022-06-01 This book scrutinizes the practice of sailing and its relation to philosophy of mind Sailing brings about a peculiar human artifact interaction which can lead to unexplored research paths The idea behind this collection is that this interaction is better scrutinized by sailor scientists philosophers to open up new possible pathways in research Fascinating theoretical breakthroughs have been provided by observing sailing practices with the most well known being Hutchins introduction in cognitive science of the concept of distributed cognition However in times past sailing has both fueled philosophical metaphors from Theseus ship to Plato s image of the intellect as the boatperson of the soul and inspired philosophers views as happened to Herder during a stormy sea trip The ecology of sailing is highly constrained sailboats move at the surface between a compressible fluid and an incompressible fluid Wind originates in certain specific circumstances Only certain sequences of actions are possible to take advantage of this ecology The ontology of sailing is both of the boat and of the ocean wind system It highlights the fact that sailboats have been for centuries arguably the most complex technological artifacts in each culture that developed them precisely because the environment they are engaging is so peculiar and demanding almost the precise dual of Sapiens adaptive environment This volume will appeal to philosophers of mind cognitive psychologists and marine professionals

Sailing and Social Class Alan O'Connor, 2024-04-23 This book explores the sociology of sailing and yachting Drawing on original research and employing a theoretical framework based on the work of Pierre Bourdieu the book argues that sailing is still an upper middle class activity that has much to tell us about the wider sociology of leisure and sport The book examines the historical foundations of blue water sailing as established by naval and colonial shipping to trace the roots of contemporary sailing and yachting culture It also examines archives of sailing narratives and cruising guides as well as the children's books of Arthur Ransome arguing that this archival material offers a social rather than a psychological interpretation of the bodily investment in sailing The book uses Bourdieu's concepts of *illusio* an investment of time emotion and body into a worthwhile activity and *habitus* or *lifeworld* alongside contemporary data sets to examine the yacht club as a social institution including why many boats never go out on the water the relationship between yacht clubs and the state and social issues as manifested in yacht clubs such as sexism racism and homophobia Offering a vigorous sociological critique of yachting and sailing this book is fascinating reading for anybody with an interest in the sociology of leisure and sport subcultures social theory or social issues in wider society
