Visual Behavior in Salamanders Gerhard Roth, 2012-12-06 Salamanders are subject to misconceptions even among vertebrate zoologists and physiologists They are often said to exist only in northern temperate zones being bound to aquatic or very moist cool habitats In reality more than half of all salamander species live in subtropical and tropical zones ex clusively in the New World Again more than half of the salamand r species have become totally independent of aquatic habitats following the loss of a free larval stage Many of the subtropical and tropical salamanders have become adapted to rather high temperatures up to 26 28 DC The brain and the sensory systems of salamanders are often considered to be primitive and their behavior is thought to be simple and uninfluenced by learning However careful studies show that the salamander brain possesses virtually all the ana tomical and functional properties found in anurans which are usually regarded as being much more evolved with respect to the guidance of comparable behavior Most of the salamander species not only possess a highly efficient visual system which is the topic of the present work but can orient themselves almost as effectively by means of olfaction vibration sense and electroreception Furthermore it has recently been shown that at least part of their behavior especially that concerned with feeding and prey preferences is strongly influenced by individual experience Rare Books, Manuscripts, First Editions, Autograph Letters from the Estate of the Late Gabriel Wells, 145 West 57th Street, New York 19, N. an unknown sovereign a so called Master of the Sea Faced with such uncertainty the three sorcerers must put their regular diplomatic duties to one side and discover the lair of these naval brigands before they can strike again Together with a hastily organized crew of merchants royalty mercenaries and soldiers they will sail out into the vast largely unexplored expanses of the Northern Sea guite unsure of what exactly they will find Little do they know that they will come across a civilization so ancient so sophisticated and more fearsome than they could possibly imagine The Numismatic Circular and Catalogue of Coins, Tokens, Commemorative & War Medals, Books & Cabinets Spink & Son, 1895 Beeton's Tales of perils and adventures by sea and land, ed. by S.O.
