Reader's Guide to the History of

Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals, Einstein, institutions and disciplines. Mathematics, general themes, Romantic Science and central concepts, Paradigm and Fact. The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn. *The International Handbook of Psychology* Kurt Pawlik, Mark R. Rosenzweig, 2000-07-21 The International Handbook of Psychology is an authoritative resource covering all the main areas of psychological science and written by an outstanding set of authors from around the world. The 31 chapters cover not only scientific but also applied, cross-disciplinary aspects. Supervised by an International Editorial Advisory Board (IEAB) of 13 eminent psychologists and edited by Professors Kurt Pawlik and Mark R. Rosenzweig, it is being published under the auspices of the International Union of Psychological Science (IUPsyS) by SAGE Publications Ltd in London. The International Handbook of Psychology will be invaluable to advanced undergraduates, graduate students and academics in psychology and will also be of interest to students of education, sociology, political science, humanities, philosophy, informatics, cognitive sciences, neuroscience, legal sciences and criminology and will serve as a general resource/reference text written at a level comparable to *Scientific American*. This impressive volume covers a tremendous amount of work. It is well organized; authors have generally kept to a standard brief. It is also truly international both in authorship and the origin of the work referenced. This will provide a very useful reference book for undergraduate and postgraduate students. *British Journal of Educational Psychology* **The Oxford Handbook of the History of Psychology: Global Perspectives** David B. Baker, 2012-01-13 The science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today. Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others but in today's global culture there is a greater need in psychology for international understanding. This volume describes the historical development of psychology in countries throughout the world. Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations' psychologies. Each unique story adds another element to our understanding of the history of psychology. The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives. Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of the human condition. *Making All the Difference* Martha Minow, 2016-10-01 Should a court order medical treatment for a severely disabled newborn in the face of the parents' refusal to authorize it? How does the law apply to a neighborhood that objects to a group home for developmentally disabled people? Does equality mean treating everyone the same even if such treatment affects some people adversely? Does a state requirement of employee maternity leave serve or

violate the commitment to gender equality Martha Minow takes a hard look at the way our legal system functions in dealing with people on the basis of race gender age ethnicity religion and disability Minow confronts a variety of dilemmas of difference resulting from contradictory legal strategies strategies that attempt to correct inequalities by sometimes recognizing and sometimes ignoring differences Exploring the historical sources of ideas about difference she offers challenging alternative ways of conceiving of traits that legal and social institutions have come to regard as different She argues in effect for a constructed jurisprudence based on the ability to recognize and work with perceptible forms of difference Minow is passionately interested in the people different people whose lives are regularly mis shaped and mis directed by the legal system s ways of handling them Drawing on literary and feminist theories and the insights of anthropology and social history she identifies the unstated assumptions that tend to regenerate discrimination through the very reforms that are supposed to eliminate it Education for handicapped children conflicts between job and family responsibilities bilingual education Native American land claims these are among the concrete problems she discusses from a fresh angle of vision Minow firmly rejects the prevailing conception of the self that she believes underlies legal doctrine a self seen as either separate and autonomous or else disabled and incompetent in some way In contrast she regards the self as being realized through connection capable of shaping an identity only in relationship to other people She shifts the focus for problem solving from the different person to the relationships that construct that difference and she proposes an analysis that can turn difference from a basis of stigma and a rationale for unequal treatment into a point of human connection The meanings of many differences can change when people locate and revise their relationships to difference she asserts The student in a wheelchair becomes less different when the building designed without him in mind is altered to permit his access Her book evaluates contemporary legal theories and reformulates legal rights for women children persons with disabilities and others historically identified as different Here is a powerful voice for change speaking to issues that permeate our daily lives and form a central part of the work of law By illuminating the many ways in which people differ from one another this book shows how lawyers political theorist teachers parents students every one of us can make all the difference

Discovering the History of Psychiatry Mark S. Micale, Roy Porter, 1994 This book brings together leading international authorities physicians historians social scientists and others who explore the many complex interpretive and ideological dimensions of historical writing about psychiatry The book includes chapters on the history of the asylum Freud anti psychiatry in the United States and abroad feminist interpretations of psychiatry s past and historical accounts of Nazism and psychotherapy as well as discussions of many individual historical figures and movements It represents the first attempt to study comprehensively the multiple mythologies that have grown up around the history of madness and the origin functions and validity of these myths in our psychological century

Bibliography of the History of Medicine, 1984

Biographical Dictionary of Psychology Antony J. Chapman, Wendy Conroy, Noel Sheehy, 2016-01-08 The Biographical

Dictionary of Psychology provides biographical information and critical analysis of the influences and reception of over 500 people who have made a significant contribution to the field of psychology. Written by an international team of contributors, this volume charts the development of the practice of psychology worldwide from its emergence in the 1850s up to the present day. Biographies range from important historical figures to those who have had a more recent impact on the field, including Chris Argyris, Donald Broadbent, Kay Deaux, Leon Festinger, Sigmund Freud, Erich Fromm, Francis Galton, Eleanor Gibson, Doreen Kimura, Ulric Neisser, Jean Piaget, Herbert A. Simon, B. F. Skinner, Amos Tversky. Entries are alphabetically organized and similarly structured for ease of access and allowing comparison of information. Introductory biographical details cover main fields of interest, nationality, principal appointments, honours and places and dates of birth and death. This is followed by full bibliographic details of principal publications as well as secondary and critical literature which provide a useful route into further research. Following on from there is an invaluable critical appraisal of the major achievements, influences and reception of the psychologists themselves. Thorough indexing allows the reader to access information by American Psychological Association subject division, key concepts, name and institution.

The Columbia History of Twentieth-century French Thought Lawrence D. Kritzman, Brian J. Reilly, 2006. Unrivalled in its scope and depth, *The Columbia History of Twentieth Century French Thought* assesses the intellectual figures, movements and publications that helped shape and define fields as diverse as history and historiography, psychoanalysis, film, literary theory, cognitive and life sciences, literary criticism, philosophy and economics. More than two hundred entries by leading intellectuals discuss developments in French thought on such subjects as pacifism, fashion, gastronomy, technology and urbanism. Contributors include prominent French thinkers, many of whom have played an integral role in the development of French thought, and American, British and Canadian scholars who have been vital in the dissemination of French ideas.

An Emotional History of the United States Peter N. Stearns, Jan Lewis, 1998. Emotions lie at our very core as human beings. How we process and grapple with our emotions, how and what we emote, and how we respond to the emotions of others, constitute the essence of our social universe. In a very real sense, we exist only through the prism of our emotions. And yet the profound effect of human emotion on history, politics, religion and culture remains underexamined. While the influence of emotion in such realms as American foreign policy has been well documented, other emotional aspects of American history have escaped notice. What role, for instance, does emotion have in the practice of African American religion? How do shame and self-hatred influence American conceptions of identity? How does our emotional life change as we age? To what degree is American consumerism driven by basic human emotion? With this landmark anthology, historians Peter N. Stearns and Jan Lewis provide a road map of the American emotional landscape. From the emotional world of working-class Massachusetts to the prayers of evangelical and pentecostal women, and the gendered nature of black rage, these essays provide a multicultural snapshot of the unique nature and evolution of American emotions.

Educational Administration & Supervision, 1927 Personality and Disease

Christoffer Johansen, 2018-06-29 A tremendous amount of research has been performed looking at the relationship between personality and disease. Research on this topic has been spread throughout scientific journals on psychology, behavioral health, psychoneuroimmunology, oncology, and epidemiology. *Personality and Disease* brings this research together in one place for the first time. With contributions from world experts, the book summarizes research findings on personality as it relates to cancer, heart disease, diabetes, asthma, and allergies, dementia, and more. Is there such a thing as a cancer-prone personality? Do sadness, anger, stress, or shyness affect the likelihood that we will fall ill to specific diseases? Can we protect ourselves from disease through a positive outlook? This book will address both what we know and what we persist in believing despite evidence to the contrary, and why such beliefs persist in the face of evidence. Investigates whether and how personality affects disease generally. Includes cancer, heart disease, diabetes, asthma, allergies, and dementia. Separates fact from fiction, evidence from beliefs. Collates research from a wide variety of scientific domains. Contains international perspectives from top scholars.
