Social Theory and Archaeology Michael Shanks, Christopher Y. Tilley, 1988 **Social Theory in Archaeology** Michael B. Schiffer, 2000 A handbook to an array of theoretical approaches that contribute something provocative or significant to the enterprise of constructing social theory in archaeology setting the agenda for future research

Companion to Social Archaeology Lynn Meskell, Robert W. Preucel, 2008-04-15 The Companion to Social Archaeology is the first scholarly work to explore the encounter of social theory and archaeology over the past two decades Grouped into four sections Knowledges Identities Places and Politics each of which is prefaced with a review essay that contextualizes the history and developments in social archaeology and related fields Draws together newer trends that are challenging established ways of understanding the past Includes contributions by leading scholars who instigated major theoretical trends

Social Theory and Archaeology Michael Shanks, Christopher Tilley, 1996 **Framing Archaeology in the Near East** Ianir Milevski, Thomas Evan Levy, 2017 This volume presents a series of studies by scholars working in Middle Eastern archaeology who actively apply social theory to interpret their fieldwork It aims to highlight the value of using social theory in the interpretation of field work in a region where traditionally such approaches have not played a major role There are a number of factors that account for why social theory is often under exploited by archaeologists in this part of the world In many countries where large numbers of the foreign archaeologists are involved a division between those doing fieldwork and those undertaking archaeological interpretation can easily arise Or the lack of interest in social theory may stem from a legacy of positivism that overrides other approaches There is also the fact that archaeology and anthropology often belong to separate academic departments and are considered two separate disciplines disconnected from each other In some cases the centrality of historical paradigms has precluded the use of social theory There are also divisions between universities and other research institutions such as departments of antiquities which is not conducive to interdisciplinary cooperation This factor is especially debilitating in contexts of rapid destruction of sites and the exponential growth of salvage excavations and emergency surveys The papers integrate a wide range of perspectives including New or Processual archaeology Marxist Post Processual evolutionist cognitive symbolic and Cyber archaeologies and touch on many topics including 3D representation GIS mapping and social theory semiotics and linguistics gender and bioarchaeology social and technical identities and modern historical modelling and social practices in Middle Eastern archaeology

Social Theory in Archaeology and Ancient History Geoff Emberling, 2016 This book reflects on big questions in archaeology and ancient history including how societies grew and how they collapsed

Social Theory in Archaeology and Ancient History Geoff Emberling, 2015-11-24 At a time when archaeology has turned away from questions of the long term and large scale this collection of essays reflects on some of the big questions in archaeology and ancient history how and why societies have grown in scale and complexity how they have maintained and discarded aspects of their own cultural heritage and how they

have collapsed In addressing these long standing questions of broad interest and importance the authors develop counter narratives new ways of understanding what used to be termed cultural evolution Encompassing the Middle East and Egypt India Southeast Asia Australia the American Southwest and Mesoamerica the fourteen essays offer perspectives on long term cultural trajectories on cities states and empires on collapse and on the relationship between archaeology and history The book concludes with a commentary by one of the major voices in archaeological theory Norman Yoffee

Archaeological Theory Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors

Maschner, Christopher Chippindale, 2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology
