Sociological Reasoning Towards A Past Modern Sociology:

Sociological Reasoning Rob Stones, 1996-07-03 While sociological modernists were outrageously presumptuous in their claims for sociological knowledge postmodernists have gone to another extreme in claiming that it has no more truth status than fiction Critical of both positions *Sociological Reasoning* develops an original typology of approaches to social scientific theory and research which is distinguished by its openness and reflexive awareness of rhetorical and methodological aspects of knowledge claims Laced with graphic illustrative examples this is a strikingly well written text that will appeal to students at undergraduate level and beyond

Ethnographic Methods Karen O'Reilly, 2005 Ethnography isn't a prescribed set of methods it's a methodology that acknowledges the complexity of human experience and the need to research it by close and sustained observation of human behaviour In this comprehensive yet concise introduction Karen O'Reilly introduces the reader to the technical practical and philosophical issues that arise when employing traditional and innovative research methods in relation to human agents She invites the reader to engage in reflexive and creative research that draws critically and creatively from the full range of qualitative methods Using case studies of students work to illustrate the dilemmas and resolutions that an ethnographic researcher may encounter this textbook guides the reader from the initial design and planning stages through to the analysis and writing up It explores the historical and philosophical foundations of

ethnographic research and goes on to cover a range of relevant topics such as participant observation qualitative interviews focus group interviews and visual data collection and analysis Designed primarily for undergraduates this book incorporates complex methodological debates which will also engage more experienced researchers perhaps coming to ethnography for the first time Reflexive Ethnography Charlotte Aull Davies,2012-08-06 Reflexive Ethnography is a unique guide to ethnographic research for students of anthropology and related disciplines It provides practical and comprehensive guidance to ethnographic research methods but also encourages students to develop a critical understanding of the philosophical basis of ethnographic authority Davies examines why reflexivity at both personal and broader cultural levels should be integrated into ethnographic research and discusses how this can be accomplished for a variety of research methods This revised and updated second edition includes a new chapter on internet based research and interethnography chapters on selection of topics and methods data collection and analysis and ethics and politics of research practical advice on writing up ethnographic study new and updated research examples Postmodernist relativism can lead to an over emphasis on reflexivity that denies the possibility of social research Reflexive Ethnography utilises postmodernist insights incorporation of different standpoints exposure of the intellectual tyranny of meta narratives but proposes that reflexive ethnographic research be undertaken from a realist perspective Reflexive Ethnography will help students to use and understand ethnographic research practices that fully incorporate reflexivity without abandoning claims to develop valid knowledge of social reality

Accounting and Social Theory Lisa Jack,2016-10-14 Is society possible without accounting In speech or in writing we communicate actions plans and decisions using numbers calculations words and images Although accounting research is dominated by quantitative analyses the role of accounting in society is firmly established over thousands of years In this concise book Lisa Jack demonstrates the power of social theory in expanding the value of accounting research Accounting and Social Theory An introduction includes advice on research problems as well as guidance on fertile areas for new research The tools techniques and developments covered by the author help readers to see social research in accounting as the study of the use misuse and abuse of accounting communications by people and the effects that this has on social relationships Stories of accounting in war agriculture and food gender health and other areas illustrate the ways in which the threads of accounting run through society Having emerged from the author's wealth of teaching experience this book provides a student focused treasure trove that illuminates the field for early career researchers in accounting and established academics looking to expand the impact of their work *The Politics of Truth and Reconciliation in South Africa* Richard Wilson,2001-05-02 The South African Truth and Reconciliation Commission TRC was set up to deal with the human rights violations of apartheid during the years 1960 1994 However as Wilson shows the TRC's restorative justice approach to healing the nation did not always serve the needs of communities at a local level Based on extended anthropological fieldwork this book illustrates the impact of the TRC in urban African communities in Johannesburg While a religious

constituency largely embraced the commission's religious redemptive language of reconciliation Wilson argues that the TRC had little effect on popular ideas of justice as retribution This provocative study deepens our understanding of post apartheid South Africa and the use of human rights discourse It ends on a call for more cautious and realistic expectations about what human rights institutions can achieve in democratizing countries

Not Losing Face

Richard Michael Head,2025-01-01 What power is may be or imagined to be through human considerations It is vital since the energy used to generate power is life's social and cultural fabric Since power is understood in many ways it shows that it is too complicated to just conveniently rationalize from a compartmental methodology However there is also a paradox here since power can be reduced to the simplicity of acting in a certain way or not acting in a certain way This acting may be self induced or from pressure applied by others and societal expectations Hence power is multifaceted but also of a binary yes or no within its potentiality and actuality It is the versatile nature of power within the space of its binary disposition that the book interweaves with When interweaving eleven faces have been selected to offer what power is and does Eight are prominent social thinkers or simply thinkers who consider what life is as it may be incorrect just to restrict or label them to the social aspect of living as being of and in existence is more than that Another is the physical evolving environment through which all living beings enjoy movement One other participates with power through religious filters of production and the remaining one is an artistic appreciation of how to power My face of power filters these faces

Institutional Analysis and Praxis Tara Natarajan,Wolfram Elsner,Scott Fullwiler,2009-09-03 There has never been a better time for the social fabric matrix As this book is being published the idea that unregulated market capitalism leads to the best of all possible worlds has been thoroughly discredited A series of economic and social problems have come to the forefront of national discussion and policy debates There is now widespread acceptance that human activity particularly the consumption of nonrenewable energy resources has contributed to global warming The lack of oversight of the financial industry encouraged reckless practices that endangered the stability of the entire financial system prompting bailout efforts based on the fragile interdependence of the financial and economic systems The shortcomings of our health care system are increasingly evident including the growing number of uninsured citizens the difficulties for businesses in offering health insurance and the effects of health and health care on the ability of individuals and families to maintain a decent standard of living Perhaps the best illustration of a complex system that cries out for coordinated policy making is in the critical area of energy where public and private decisions on energy policy not only have direct effects on consumer costs but also have effects on global warming local ecosystems international relations the health of our citizens and the sustainability of companies and communities In short there is growing recognition of the interdependence of the economic system with the environment and the broader institutions of society
