From Individual Wellbeing to Regional Priorities Silva Larson, 2011-07-12 The understanding of subjective perceptions of wellbeing that is the perceived needs and current levels of satisfactions of people could provide valuable information for policy and decision makers It would allow for the mapping of the envisaged impacts of policy against things that people value and care about thus providing information about the positive and negative potential of different policy options to impact upon human welfare In this book Dr Silva Larson takes us on a journey of explorations into the things that are important to people She argues that an approach which takes into account both what people value most and how satisfied they are with the current state of affairs would assist decision makers with identifying perceived regional priorities Further she proposes and describes one such approach that of using a quantitative composite value that combines both types of information and demonstrates using two shires in the Great Barrier Reef region of Australia as examples how this can be done The resulting action lists identify and quantify the unsatisfied needs of most importance to most people in the region that is factors that have high potential to improve the quality of life of residents if restored *Handbook of Social Problems* George Ritzer, 2004 Ritzer's *Handbook of Social Problems* offers a comprehensive treatment of today's major societal issues The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike The international coverage is most welcome in this time of intensifying global inequalities Nancy Jurik Arizona State University The *Handbook of Social Problems A Comparative International Perspective* provides a unique broadly comparative perspective on the current state of social problems and deviance in a variety of societies around the world Editor George Ritzer along with leading U S and international sociologists examines the relationship between social problems and a society's level of development and affluence The essays in this volume focus on four interrelated issues involved in the relationship between social problems and the level of development and affluence Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies It is only with affluence

that certain things can come to be imagined as social problems such as excessive consumption The very affluence of a society makes it vulnerable to problems that would not be social problems in poorer societies The Handbook explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies This theory is clearly illustrated in this volume by the aftermath of September 11 2001 depicting the vulnerability of the U S to social problems in far removed corners of the world In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems ecological problems global inequality health as a social problem and much more The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library
