Culture's Software Dorota Brzozowska, Władysław Chłopicki, 2015-09-10 When Geert Hofstede famously defined culture as collective programming of the mind the definition broadly referred to culture as such including all the layers in his onion model The title of this volume Culture's Software represents a development of this original idea and was inspired by none other than Professor Hofstede himself He used this phrase over thirty years later when lecturing to an international group of scholars gathered in Poland to debate the idea of cultural communication styles which has in recent years been fruitfully discussed from a fresh perspective by scholars working within cognitive and cultural linguistics The debate has given rise to this book which will inspire further research into this fascinating subject

Software Theory Federica Frabetti, 2014-11-17 The cultural and philosophical study of software is crucial both within and outside of the university at an international level and across disciplines Software is increasingly considered the focus of digital media studies because of the perceived need to address the invisibility ubiquity and power of

digital media Yet software remains quite obscure to students and scholars in media studies the social sciences and the humanities This unique book engages directly in close readings of technical texts and computer code in order to show how software works and in what sense it can be considered constitutive of culture and even of human thought Federica Frabetti combines this with an engagement with thinkers such as Bernard Steigler and Jacques Derrida to problematize the very nature of the conceptual system on which software is based and which has shaped its historical evolution The book argues for a radical demystification of software and digital technologies by addressing the mystery that surrounds its function and that affects our comprehension of its relationship between technology philosophy culture and society **The Media Reader**

Hugh Mackay,Tim O'Sullivan,1999-07-06 This essential sourcebook of key statements about transformations in media culture focuses on questions of democracy technology and culture It provides theoretical approaches to past and present media transformations and case studies of a range of media examining both old media in new times and emerging new media It explores the technological economic social and cultural processes implicated in the production regulation circulation and consumption of media forms **Self-Presentation and Self-Praise in the Digital Workplace** Anna
