The IEEE Guide to Writing in the Engineering and Technical Fields David Kmiec, Bernadette Longo, 2017-08-30 Helps both engineers and students improve their writing skills by learning to analyze target audience tone and purpose in order to effectively write technical documents This book introduces students and practicing engineers to all the components of writing in the workplace It teaches readers how considerations of audience and purpose govern the structure of their documents within particular work settings The IEEE Guide to Writing in the Engineering and Technical Fields is broken up into two sections Writing in Engineering Organizations and What Can You Do With Writing The first section helps readers approach their writing in a logical and persuasive way as well as analyze their purpose for writing The second section demonstrates how to distinguish rhetorical situations and the generic forms to inform train persuade and collaborate The emergence of the global workplace has brought with it an increasingly important role for effective technical communication Engineers more often need to work in cross functional teams with people in different disciplines in different countries and in different parts of the world Engineers must know how to communicate in a rapidly evolving global environment as both practitioners of global English and

developers of technical documents Effective communication is critical in these settings The IEEE Guide to Writing in the Engineering and Technical Fields Addresses the increasing demand for technical writing courses geared toward engineers Allows readers to perfect their writing skills in order to present knowledge and ideas to clients government and general public Covers topics most important to the working engineer and includes sample documents Includes a companion website that offers engineering documents based on real projects The IEEE Guide to Engineering Communication is a handbook developed specifically for engineers and engineering students Using an argumentation framework the handbook presents information about forms of engineering communication in a clear and accessible format This book introduces both forms that are characteristic of the engineering workplace and principles of logic and rhetoric that underlie these forms As a result students and practicing engineers can improve their writing in any situation they encounter because they can use these principles to analyze audience purpose tone and form

Design + Environment Helen Lewis, John Gertsakis, Tim Grant, Nicola Morelli, Andrew Sweatman, 2017-09-08 There is a huge scarcity of good practical resources for designers and students interested in minimizing the environmental impacts of products Design Environment has been specifically written to address this paucity The book first provides background information to help the reader understand how and why design for environment DfE has become so critical to design with reference to some of the most influential writers designers and companies in the field Next Design Environment provides a step by step approach on how to approach DfE to design a product that meets requirements for quality cost manufacturability and consumer appeal while at the same time minimising environmental impacts The first step in the process is to undertake an assessment of environmental impacts using life cycle assessment LCA or one of the many simpler tools available to help the designer From then on DfE becomes an integral part of the normal design process including the development of concepts design of prototypes final design and development of marketing strategies Environmental assessment tools and strategies to reduce environmental impacts such as the selection of appropriate materials are then discussed Next some of the links between environmental problems such as global warming ozone depletion water and air pollution and the everyday products we consume are considered In order to design products with minimal environmental impact we need to have a basic understanding of these impacts and the interactions between them The four subsequent chapters provide more detailed strategies and case studies for particular product groups packaging textiles furniture and electrical and electronic products Guidelines are provided for each of the critical stages of a product's life from the selection of raw materials through to strategies for recovery and recycling Finally Design Environment takes a look at some of the emerging trends in DfE that are offering us the opportunity to make a more significant reduction in environmental impacts Both the development of more sustainable materials and technologies and the growing interest in leasing rather than selling products are examined Design Environment is organized as a workbook rather than an academic text It should be read once and then used as a key reference source This clear and informative book will prove to be

invaluable to practising designers to course directors and their students in need of a core teaching and reference text and to all those interested in learning about the tools and trends influencing green product design The authors have all been involved in an innovative demonstration programme called EcoReDesign which was developed by the Centre for Design at RMIT University with funding from the Australian government The Centre successfully collaborated with Australian companies to improve the environmental performance of their products by following DfE principles

Religion, Ecology & Gender Sigurd Bergmann, Yong-bok Kim, 2009 The understanding of nature is at the heart of European self understanding while in Asia the terms of life and energy play a similar central role Globally many institutions and movements have made the protection of the environment and climate a top policy priority Given the urgency of environmental problems the lack of reflections about the human and especially the spiritual dimension of environmental problems is striking Environmental and climatic change transforms not only culture politics and economy but also religion Religious traditions have on the one hand always been dependent on human ecologies on the other hand they vibrantly affect our perceptions of nature and sociocultural practices with in it If life and religion change dramatically at present how could religion make a change How are religious and ecologic processes gendered and how can ecofeminism deepen our understanding of justice What are the life enhancing spiritual resources in the East and the West How can Christian theology contribute to the necessary eco cultural revolution ahead of us And how can Buddhist Taoist Confucian and Christian spiritualities cooperate in a common space and future Questions like these are reflected upon by scholars of

religion and theology from Korea Canada and Scandinavia Their chapters emerge from an international workshop which was arranged and convened by the editors 2007 in Yecheon on the Korean countryside and in Seoul
