*Sturmgeschütz* Thomas Anderson, 2017-10-19 First established in 1940 the Sturmgeschütz assault guns were purpose built vehicles intended to support the infantry during the phase of attack and breakthrough of enemy positions During the eastern campaign the Sturmgeschütz proved to be potent tanks destroyers able to reliably defeat even T 34 and KV heavy tanks Cheaper and quicker to produce than the German Panzers it was deployed widely and with great success forming an integral part of armoured units particularly in the final desperate days of the war when tank production could not keep up with the needs of the war effort Drawing on original material from German archives and private collections and replete with over 200 images this book tells the thrilling story of the Wehrmacht's unsung workhorse in the final years of World War II

Zaloga, 2019-08-22 In the summer of 1944 the Red Army staged a massive armoured assault up the Karelian Isthmus with the intent of eliminating any remaining German and Finnish forces facing the

Leningrad region Most of the Soviet units sent into Finland were new to the region moving mainly from the fighting in the Leningrad area As a result some had the latest types of Soviet equipment including the new T 34 85 tank fielded alongside the older T 34 76 Germany refused to sell the Finns new tanks without a reinforced military alliance but in 1943 began selling them a few dozen StuG III assault guns This made the StuG III battalion the most modern and powerful element of the Finnish armoured division and it saw very extensive combat in the June July summer battles Featuring specially commissioned artwork and an array of archive photographs this is the absorbing story of the parts played by Soviet and Finnish armour in the epic battles in Finland during June and July 1944

*M10 Tank Destroyer vs StuG III Assault Gun* Steven J. Zaloga, 2013-08-20 The Allies M10 Tank Destroyer and the Germans Sturmgeschütz StuG III were the unsung workhorses of the northwest European battlefields of 1944-45 While their mission was not principally fighting one another their widespread use ensured their frequent encounters from the Normandy Bocage to the rubble strewn streets of Aachen The StuG III was the quintessential assault gun a low slung heavily armoured turretless vehicle intended to provide direct fire support for infantry formations whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer However by 1944 the 3in gun proved ineffectual against the most thickly armored German tanks and was consequently relegated to infantry support too Widely deployed in roles their designers had not envisaged these two armoured fighting vehicles clashed repeatedly during the 11 month campaign which saw the Allies advance from Normandy to the heart of the Reich Fully illustrated with specially commissioned artwork this is the story of their confrontation at the height of World War II

**German Assault Guns and Tank Destroyers 1940 - 1945** Anthony Tucker-Jones, 2016-10-30 The assault guns and tank destroyers deployed by the Wehrmacht during the Second World War are not as famous as tanks like the Tiger and Panther but they were remarkably successful and they are the subject of Anthony Tucker Jones's wide ranging photographic history As the conflict progressed the German army had to find a use for its obsolete panzers and this gave rise to the turretless Sturmgeschütz or assault guns designed for infantry support From 1944 onwards they played a vital role in Nazi Germany's increasingly defensive war A selection of rare wartime photographs shows the variety of turretless armored fighting vehicles that were produced and developed various models of the Sturmgeschütz III the Sturmhaubitze Jagdpanzer Panzerjäger Marder Hetzer Often a lack of tanks meant that these

armoured vehicles were called on to fill the panzer's role and they proved ideal during the Germans' defensive battles on the Eastern Front as well as in Italy and Normandy they were instrumental in delaying Germany's defeat This highly illustrated account provides a fascinating introduction to one of the less well known aspects of armored warfare during the Second World War

**Bloody Verrieres, Volume 1** Arthur W. Gullachsen,2021-12-31 An excellent work that adds to the history of the Normandy Campaign It also gives the armchair historian points to ponder A Wargamers Needful Things South of the Norman city of Caen the twin features of the Verri res and Bourguebus ridges were key stepping stones for the British Second Army in late July 1944 taking them was crucial if it was to be successful in its attempt to break out of the Normandy bridgehead To capture this vital ground Allied forces would have to defeat arguably the strongest German armored formation in Normandy the I SS Panzerkorps Leibstandarte The resulting battles of late July and early August 1944 saw powerful German defensive counterattacks south of Caen inflict tremendous casualties regain lost ground and at times defeat Anglo Canadian operations in detail Viewed by the German leadership as militarily critical the majority of its armored assets were deployed to dominate this excellent tank country east of the Orne river These defeats and the experience of meeting an enemy with near equal resources exposed a flawed Anglo Canadian offensive tactical doctrine that was overly dependent on the supremacy of its artillery forces Furthermore weaknesses in Allied tank technology inhibited their armored forces from fighting a decisive armored battle forcing Anglo Canadian infantry and artillery forces to further rely on First World War Bite and Hold tactics massively supported by artillery Confronted with the full force of the Panzerwaffe Anglo Canadian doctrine at times floundered In response the Royal Artillery and Royal Canadian Artillery units pummeled the German tankers and grenadiers but despite their best efforts ground could not be captured by concentrated artillery fire alone This is a detailed account of the success of I SS Panzerkorps defensive operations aimed at holding the V rrieres Bourgebus ridges in late July 1944
