## **Stuttering Intervention A Collaborative Journey To Fluency Freedom:**

Stuttering Intervention David Allen Shapiro, 1999      Evidence-Based Practice in Speech Pathology Sheena Reilly, Jenni Oates, 2003-12-19 This text introduces therapists and speech pathologists to the principles of evidence based practice and guides readers to the best available evidence regarding the management of a range of disorders within speech pathology. It should be applicable to speech pathologists at any stage of their clinical career as well as being of use to speech pathology students and other health care professionals. The book is organized into three sections. In the first the subject of evidence based practice is introduced. Its application to the profession of speech pathology is addressed and types and levels of evidence are described. The second part focuses on a number of sub specialist areas of speech pathology practice: dysphagia, paediatric motor speech disorders, aphasiology, voice, paediatric language and AAC. In the third section of the book the authors demonstrate how to apply the principles of evidence based practice to clinical practice, to research and to education.

**Evidence-Based Treatment of Stuttering** Anne K. Bothe, 2004-07-19 This book is the result of a State of the Art Conference held at the University of Georgia dedicated to the evidence based treatment of stuttering. An international group of prominent fluency researchers and clinicians were invited to present and discuss current data and issues related to the treatment of stuttering. The topic was defined to include evidence about stuttering, evidence about stuttering treatment, and discussions of how that evidence should guide the continuing research and practice. The explicit link between empirical evidence and suggestions for clinical practice is the goal of the book. The book begins by addressing the notion of evidence based practice and considers its implications for stuttering treatment. Part II presents the intersection of the nature of stuttering, the theories of stuttering, and the implications of nature theory and other knowledge for stuttering treatment decisions. Part III provides two of the many measurement issues facing stuttering treatment, followed by Part IV which is devoted to the quality of treatment research evidence for specific treatments and in terms of some more general methodological and professional issues. The final part summarizes the clinical recommendations made throughout the book and discusses evidence based outcomes focused clinical decisions for stuttering. These chapters are intended to provide state of the art information to researchers, clinicians, and students who are interested in developing, identifying, or using the best possible evidence based treatments for stuttering.
