**Good Humor, Bad Taste** Giseline Kuipers,2011-12-22

Good Humor Bad Taste is the first extensive sociological study of the relationship between humor and social background Using a combination of interview materials survey data and historical materials the book explores the relationship between humor and gender age regional background and especially humor and social class in the Netherlands The final chapter focuses on national differences exploring the differences between the American and the Dutch sense of humor again using a combination of interview and survey materials The starting point for this exploration of differences in sense of humor is one specific humorous genre the joke The joke is not a very prestigious genre in the Netherlands even less so than in the US It is precisely this lack of status that made it a good starting point for asking questions about humor and taste Interviewees generally had very pronounced opinions about the genre calling jokes their favorite kind humor but also completely devoid of humor and a form of intellectual poverty Good Humor Bad Taste attempts to explain why jokes are good humor to some bad taste to others The focus on this one genre enables Good Humor Bad Taste to have a very wide scope The book not only covers the appreciation and evaluation of jokes by different social groups and in different cultures and its relationship with wider humor styles It also describes the genre itself the history of the genre its decline in status from the sixteenth century onward and the way the topics and the tone of jokes have changed over the last fifty years of the twentieth century
