History of the Modern Styles of Architecture ... Second Edition, Forming the Fourth Volume of the New Edition of The History of Architecture. With 332 Engravings James Fergusson, 1873 *A concise history and analysis of all the principal styles of architecture, by an amateur [E. Boid.].* Edward Boid, 1828 Excavating Modernity Joshua Arthurs, 2013-10-15 The cultural and material legacies of the Roman Republic and Empire in evidence throughout Rome have made it the Eternal City Too often however this patrimony has caused Rome to be seen as static and antique insulated from the transformations of the modern world In Excavating Modernity Joshua Arthurs dramatically revises this perception arguing that as both place and idea Rome was strongly shaped by a radical vision of modernity imposed by Mussolini's regime between the two world wars Italian Fascism's appropriation of the Roman past the idea of Rome or romanitas encapsulated the Fascist virtues of discipline hierarchy and order the Fascist new man was modeled on the Roman legionary the epitome of the virile citizen soldier This

vision of modernity also transcended Italy's borders with the Roman Empire providing a foundation for Fascism's own vision of Mediterranean domination and a European New Order. At the same time, Roman art also served as a vocabulary of anxiety about modernity. Fears of population decline, racial degeneration, and revolution were mapped onto the barbarian invasions and the fall of Rome. Offering a critical assessment of Roman art and its effects, Arthur's explores the ways in which academics, officials, and ideologues approached Rome not as a site of distant glories but as a blueprint for contemporary life, a source of dynamic values to shape the present and future.

The Cambridge Companion to the Age of Attila Michael Maas, 2015 This book considers the great cultural and geopolitical changes in western Eurasia in the fifth century CE. Attila is presented as a contributor to and a symbol of these transformations.

The Cambridge Ancient History Alan K. Bowman, Edward Champlin, Andrew Lintott, 1996-02-08 The period described in Volume X of the second edition of *The Cambridge Ancient History* begins in the year after the death of Julius Caesar and ends in the year after the fall of Nero, the last of the Julio-Claudian emperors. Its main theme is the transformation of the political configuration of the state and the establishment of the Roman Empire. Chapters 16 supply a political narrative history of the period. In chapters 7-12, the institutions of government are described and analysed. Chapters 13-14 offer a survey of the Roman world in this period, region by region, and chapters 15-21 deal with the most important social and cultural developments of the era: the city of Rome, the structure of society, art, literature, and law. Central to the period is the achievement of the first emperor, Augustus.

The Florentine Villa Grazia Gobbi Sica, 2007-12-13 Scholarly and innovative, with visually stunning line drawings and photographs, this volume provides readers with a compelling record of the unbroken pattern of reciprocal use and exchange between the countryside and the walled city of Florence from the thirteenth century up to the present day. Defying the traditional and idealized interpretation of the Florentine villa, the author analyzes the economic factors that powered the investment in and building of country houses and estates from the early Renaissance times onwards, as well as the ideology and the architectural and literary models that promoted the Florentine villa. Exploring the area between Florence and Sesto in its history, morphology, and representation, looks at the villas existing in the area. A contribution to the protection of the important cultural heritage of the landscape in the Florentine area and of its historic buildings, villas, and gardens, this study makes engaging reading not only for scholars and students in architecture, landscape design, and social history but also for the well-informed reader interested in art, architecture, and gardens.

The Architecture of Rome

Ulrich FÜRST, 1998 Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city Rome is eternal above all because it was always young always in its prime Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture In it Rome's primacy remained unbroken whether it was with old St Peter's as the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome All this is comprehensible only if it is presented historically i.e. in chronological sequence and so the guide has not been arranged topographically as usual but chronologically This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively Every epoch is preceded by an introduction that identifies its key features This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history
