Balloon and Stent for Ischemic and Hemorrhagic Stroke: A New Trend for Stroke Prevention and Management Firas Al-Ali,2015-11-09 In recent years intracranial endovascular use of Balloon and Stent has grown significantly This issue will focus primarily on recent advances in the use of these methods today This discussion will also highlight our improvements in understanding the disease process and not only relying on devices to treat a patient Wide necked intracranial aneurysms IA were originally thought to be either untreatable or at the very least

significantly challenging to treat by endovascular means due to the risk of coil protrusion and possibly parent vessel occlusion However this view now outdated today and we will discuss the significant advancement in different flow diverters The treatment of post sub arachnoid hemorrhage vasospasm is mature now as this issue will highlight In addition Intracranial atherosclerosis is still a prominent cause of stroke in various populations worldwide This issue will summarize the challenges of risk factor modification and secondary stroke prevention by defining optimal methods We will try to outline a new approach for intracranial angioplasty and stenting for stroke prevention Finally despite recent impressive increase recanalization rates in acute ischemic stroke treatment the clinical improvement rate has remained relatively stable This article will discuss a new means of improving patient selections using the capillary index score CIS The future of our specialty relies heavily on better devices and on a deeper understanding of the disease process The future is bright and we have already taken the first successful steps

Plum and Posner's Diagnosis and Treatment of Stupor and Coma Jerome B. Posner MD, Clifford B. Saper MD, PhD, Nicholas D. Schiff MD, Jan Claassen MD, PhD, 2019-07-30 Plum and Posner's Diagnosis and Treatment of Stupor and Coma 5th edition is a major update of the classic work on diagnosing the cause of coma with the addition of completely new sections on treatment of comatose patients by Dr Jan Claassen the Director of the Neuro ICU at Columbia New York Presbyterian Hospital The first chapter of the book provides an up to date review on the brain mechanisms that maintain a conscious state in humans and how lesions that damage these mechanisms cause loss of consciousness or coma The second chapter reviews the neurological examination of the comatose patient which provides the basis for determining whether the patient is suffering from a structural brain injury causing the

coma or from a metabolic disorder of consciousness The third and fourth chapters review the pathophysiology of structural lesions causing coma and the specific disease states that result in coma Chapter five is a comprehensive treatment of the many causes of metabolic coma Chapter 6 review psychiatric causes of unresponsiveness and how to identify and treat them Chapters 7 and 8 review the overall emergency treatment of comatose patients followed by the treatment of specific causes of coma Chapter 9 examines the long term outcomes of coma including the minimally conscious state and the persistent vegetative state and how they can be distinguished and their implications for eventual useful recovery Chapter 10 reviews the topic of brain death and the standards for examination of a patient that are required to make the determination of brain death The final chapter 11 is by J J Fins a medical ethicist who was invited by the other authors to write an essay on the ethics of diagnosis and treatment of patients who by definition have no way to approve of or communicate about their wishes While providing detailed background for neurological and neurosurgical specialists the practical nature of the material in this book has found its greatest use among Internists Emergency Medicine and Intensive Care specialists who deal with comatose patients frequently but who may not have had extensive neurological training
