**Towards a New Scientific Realism** Jan Voosholz, 2025-08-30 This book presents an argument for a new type of scientific realism beyond naturalism correlationism and what the author terms objective realism To achieve this positive philosophical proposal Jan

Voosholz develops a thorough critique of current debates surrounding realism and antirealism in philosophy of science as well as those concerning new and speculative realism. Moreover, in order to provide a new outlook for the philosophy of the natural sciences, this book advances and introduces decisive arguments to that debate from speculative and new realist discussions in ontology and epistemology. Consequently, it develops a unique starting point for a pluralistic philosophy of nature. Any proponent or adversary of new speculative, perspectival or pragmatic realism, ontic or epistemic structural realism, scientific pluralism, feminist or structural empiricism, selective scepticism, non reductive or reductive naturalism, with an interest in general philosophy of science, should take the careful reconstruction of the debates and the novel arguments presented in this book into account. Readers interested in philosophy and the sciences with an interest in these areas of theoretical philosophy will find in this book an informative and comprehensive outline of the state of the art in the epistemology and ontology of the natural sciences. *Time and Free Will* Henri Bergson, 2014-06-03.
