The authors largely concentrate on effective materials as opposed to equivalent materials and emphasize the fundamental but sometimes overlooked differences between these two categories of homogenized composite materials. The properties of an effective material represents those of its composite material regardless of the geometry and dimensions of the bulk materials and regardless of the orientations and polarization states of the illuminating electromagnetic fields In contrast the properties of equivalent materials only represent those of their corresponding composite materials under certain restrictive circumstances **Technology and Culture in Pharaonic Egypt** Martin Fitzenreiter, 2023-04-13 The inherent paradox of Egyptology is that the objective of its study people living in Egypt in Pharaonic times are never the direct object of its studies Egyptology as well as archaeology in general approach ancient lives through material and sometimes immaterial remains This Element explores how through the interplay of things and people of non human actants and human actors Pharaonic material culture is shaped In turn it asks how through this interplay Pharaonic culture as an epistemic entity is created an epistemic entity which conserves and transmits even the lives and deaths of ancient people Drawing upon aspects of Actor Network Theory this Element introduces an approach to see technique as the interaction of people and things and technology as the reflection of these networks of Textile Reinforced Concrete Alva Peled, Arnon Bentur, Barzin Mobasher, 2017-08-07 Textile reinforced entanglement concrete TRC has emerged in recent years as an attractive new high performance cement based composite Textiles can significantly improve the mechanical behavior of cement matrices under static and dynamic conditions and give superior tensile strength toughness ductility energy absorption and protection against environmental degrading influences Flexibility with fabric production methods enables the control of fabric and yarn geometry.
