Successful Mergers Marion Devine, 2002-05-01 Why so many mergers fail and what can be done to make them succeed Worldwide merger and acquisition activity in 2000 was worth around 1 400 billion But the M A failure rate is

high roughly half fail and the financial gains of even successful mergers are often neutral Why is this the case This book argues that the reason is because financial and strategic considerations still dominate merger negotiations and that the soft fuzzy people issues are largely ignored in the belief that they can be sorted out later during the integration phase In reality however and this has become even more true with the growth of the new economy people are the real deal makers and that it is only when individuals choose to commit their imagination creativity and energy to a merger that the real synergies flow Merger success is all about leading and managing people and the people issues need addressing right from the start of negotiations Daimler Benz Compaq and Digital Equipment and Zeneca and Astra this book examines where companies so often get things wrong and lays out a clear course for how to get it right

The impact of cultural differences on cross-border mergers at the example of DaimlerChrysler Romy Trajanov, 2006-01-19 Inhaltsangabe Abstract In the last decade many companies on a global basis are going international in order to become global players The opening of global markets e g the establishment of the Single European Market and the ratification of the Maastricht Treaty in 1992 was a key driver for international mergers and acquisitions Companies form international mergers and acquisitions to achieve the competitive position of global advantage and local responsiveness as well as to grow rapidly Mergers create synergies for all involved companies as various tangible and intangible assets will be combined whose value is greater than the sum of their individual worth Additional factors of production offering competitive advantage can be found Employees play an essential role for the success of merging companies therefore it is crucial already to deal with cultural aspects as a component of the due diligence process This creates an understanding of different national and organizational cultures for all involved cross border merging companies The national culture is an integral part of the overall corporate culture of the firm which is applicable for all merging partners The merger of DaimlerChrysler in 1998 which created one of the biggest car companies is used as an example in this study to underline cultural implications within the merging process of global players Cultural difficulties occurred between the more easy going and more flexible style of Chrysler and the well structured and bureaucratic style of Daimler Benz This was the basis of different working styles decision making and communication processes within the company This incompatibility of the two different cultural aspects was realized too late and became very difficult to be overcome That is why at the end it was no merger of equals but one company dominating over the other The complexity of the DaimlerChrysler merger shows the different aspects of cultural difference awareness The reader of this study will get a deeper insight into the issues of culture and its importance to be considered in cross border merger processes In this context further different national culture models will be analysed as well as the cultural implementation into organisations in general Furthermore after presenting the merger process of DaimlerChrysler and its reasons failures in management and cultural implementation by both companies will be discovered which caused the cultural
