**Theory of Shocks, COVID-19, and Normative Fundamentals for Policy Responses** Pilipenko, Olga Ivanovna, Pilipenko, Zoya Andreevna, Pilipenko, Andrey Igorevich, 2021-03-18 The phenomenon of shocks is often mentioned in relation to economic crises but rarely studied This gap in research has resulted in shocks being poorly understood with no fundamental explanation of their inciting conditions It is a system forming problem that cannot be investigated without dynamic ideas about the economy but an incomplete understanding of this event leaves economic systems vulnerable to collapse Theory of Shocks COVID 19 and Normative Fundamentals for Policy Responses is an essential publication that explores the factors that

cause economic shocks and the mechanisms of their implementation The book serves as a resource for the development of policy oriented frameworks for achieving and maintaining national and international strategies to properly manage future global shocks Featuring coverage of a wide range of topics including dialectics self evolvement and structural relationships this book is ideally designed for economists executives managers entrepreneurs academicians students and researchers in the areas of finance macroeconomics economic theory and risk assessment **Macroneural Theories in Cognitive**

**Neuroscience** William R. Uttal, 2015-07-24 In this book William R Uttal continues his analysis and critique of theories of mind This book considers theories that are based on macroneural responses such as those obtained from fMRI that represent the averaged or cumulative responses of many neurons The analysis is carried out with special emphasis on the logical and conceptual difficulties in developing a theory but with special attention to some of the current attempts to go from these cumulative responses to explanations of the grand question of how the mind is generated by the brain While acknowledging the importance of these macroneural techniques in the study of the anatomy and physiology of the brain Uttal concludes that this macroneural approach is not likely to produce a valid neural theory of cognition because the critical information the states of the individual neurons involved in brain activity becoming mental activity is actually lost in the process of summation Controversial topics are considered in detail including discussions of empirical logical and technological barriers to theory building in cognitive neuroscience **Secondary Education Journal** ,1986
