explained throughout the book *The Cold Calling Equation Problem Solved* is a book based on real world scenarios and developed by Michael Halper who has thirteen years experience in cold calling. An energetic sales coach he runs a telesales operation for other businesses and manages a team of callers. The book takes the reader chapter by chapter through the other stumbling blocks of cold calling and shows the salesperson how to clear these hurdles. He also demonstrates how to build target lists and scripts, deal with objections, find opportunities, build both rapport and interest, and more. The psychological state of the cold caller is taken into account as well. The book gives solid strategies for overcoming anxiety and breaks down the pernicious myth that all cold callers are born rather than made. Salespeople don't have to be extroverts or the life of the party. In fact, it's the ability to listen rather than the gift of gab that makes someone successful at business to business selling. Turning the tables on the seller, *The Cold Calling Equation Problem Solved* also demonstrates that not every lead is worth pursuing. In a powerful section on qualifying, Halper shows the salesperson how to quickly screen prospects through incisive questions. It's a tactic that makes the phone call more controversial and gets the prospect talking. Cold callers will also learn how to manage gatekeepers, turning their enemies into allies who go from blocking to opening up and pointing in the right direction. This helpful guide shows callers how to navigate objections, those challenging phrases that prospects use to get off the phone. Whether it is "I do not have time right now" or "We are not interested," Halper will show you why prospects use objections and how cold callers can get around them. Even a reader with zero sales skills and no practical experience can read this book and learn how to utilize their phone and make it into a powerful sales tool. It will move the novice cold caller from frustration and failure to control and success.
