 endohedral structures have been isolated and their endohedral nature has been proved by experimental studies Within the

Content Peter Hanks,2015-06-04 Peter Hanks defends a new theory about the nature of propositional content According to this theory the basic bearers of representational properties are particular mental or spoken actions Propositions are types of these actions which we use to classify and individuate our attitudes and speech acts Hanks abandons several key features of the traditional Fregean conception of propositional content including the idea that propositions are the primary bearers of truth conditions the distinction between content and force and the concept of entertainment The main difficulty for this traditional conception is the problem of the unity of the proposition the problem of explaining how propositions have truth conditions and other representational properties The new theory developed here in its place explains the unity of propositions and provides new solutions to a long list of puzzles and problems in philosophy of language **The Power of**

Eve Deanna Manley,2006-10 Manley reveals the power women possess through the story of Eve Readers will discover how to become better equipped to face the challenges of being a woman Practical Life *Speaking My Mind* Dorit

Bar-On,2004-11-18 Dorit Bar On develops and defends a novel view of avowals and self knowledge Drawing on resources from the philosophy of language the theory of action epistemology and the philosophy of mind she offers original and systematic answers to many long standing questions concerning our ability to know our own minds We are all very good at telling what states of mind we are in at a given moment When it comes to our own present states of mind what we say goes an avowal such as I m feeling so anxious or I m thinking about my next trip to Paris it is typically supposed tells it like it is But why is that Why should what I say about my present mental states carry so much more weight than what others say about them Why should avowals be more immune to criticism and correction than other claims we make And if avowals are not based on any evidence or observation how could they possibly express our knowledge of our own present mental states Bar On proposes a Neo Expressivist view according to which an avowal is an act through which a person directly expresses

rather than merely reports the very mental condition that the avowal ascribes She argues that this expressivist idea coupled with an adequate characterization of expression and a proper separation of the semantics of avowals from their pragmatics and epistemology explains the special status we assign to avowals As against many expressivists and their critics she maintains that such an expressivist explanation is consistent with a non deflationary view of self knowledge and a robust realism about mental states The view that emerges preserves many insights of the most prominent contributors to the subject while offering a new perspective on our special relationship to our own minds

Saviour Siblings and the Regulation of Assisted Reproductive Technology Malcolm K. Smith, 2016-03-03 Advances in the field of Assisted Reproductive Technology ART have been revolutionary This book focuses on the use of ARTs in the context of families who seek to conceive a matching sibling donor as a source of tissue to treat an existing sick child Such children have been referred to as saviour siblings Considering the legal and regulatory frameworks that impact on the accessibility of this technology in Australia and the UK the work analyses the ethical and moral issues that arise from the use of the technology for this specific purpose The author claims the only justification for limiting a family's reproductive liberty in this context is where the exercise of reproductive decision making results in harm to others It is argued that the harm principle is the underlying feature of legislative action in Western democratic society and as such this principle provides the grounds upon which a strong and persuasive argument is made for a less restrictive regulatory approach in the context of saviour siblings The book will be of great relevance and interest to academics researchers practitioners and policy makers in the fields of law ethics philosophy science and medicine

Explaining Knowledge Rodrigo Borges, Claudio de Almeida, Peter D. Klein, 2017-11-24 The Gettier Problem has shaped most of the fundamental debates in epistemology for more than fifty years Before Edmund Gettier published his famous 1963 paper it was generally presumed that knowledge was equivalent to true belief supported by adequate evidence Gettier presented a powerful challenge to that presumption This led to the development and refinement of many prominent epistemological theories for example defeasibility theories causal theories conclusive reasons theories tracking theories epistemic virtue theories and knowledge first theories The debate about the appropriate use of intuition to provide evidence in all areas of philosophy began as a debate about the epistemic status of the Gettier intuition The differing accounts of epistemic luck are all rooted in responses to the Gettier Problem The discussions about the role of false beliefs in the production of knowledge are directly traceable to Gettier's paper as are the debates between fallibilists and infallibilists Indeed it is fair to say that providing a satisfactory response to the Gettier Problem has become a litmus test of any adequate account of knowledge even those accounts that hold that the Gettier Problem rests on mistakes of various sorts This volume presents a collection of essays by

twenty six experts including some of the most influential philosophers of our time on the various issues that arise from Gettier s challenge to the analysis of knowledge Explaining Knowledge sets the agenda for future work on the central problem of epistemology **Proceedings of the Seminar for Arabian Studies Volume 54 2025** Silvia Lischi,2025-09-11 The 57th Seminar for Arabian Studies Paris 2024 brought together scholars from a broad range of disciplines to discuss the archaeology history epigraphy and philology of the Arabian Peninsula This volume includes seventeen papers presented in the ordinary sessions and three papers presented in the special session Zaydi governance in Yemen
