to the two counties both in the air and on the ground will captivate both interested locals and aviation enthusiasts alike

Cambridgeshire at War 1939-45 Glynis Cooper, 2020-03-20 Few could believe that within twenty years of the war to end all wars being won the world was once again at war Veterans of the Great War feared going through the same thing again and even worse many knew that this time their children would also be involved in the fighting What had all the sacrifice been about Cambridgeshire the city of Cambridge and the University of Cambridge were badly hit by the Great War with many lives lost families ripped apart and a way of life that had changed forever Building and economic recovery had been hindered by the Great Depression The county was not ready to face another war nor for the problems of warfare in the air Yet somehow the county the city and the university all found the strength to unite against the enemy once more and ensure that Germany would never win the war The book chronicles life on the Home Front during the Second World War which itself reached into every home and affected every citizen changing the life and the face of the county It is also a timely reminder of the difficulties hardships restrictions and morale faced by the city as the war dragged on and how the local community overcame the odds that were stacked against them Suffolk's Defended Shore Cain Hegarty, Sarah

Newsome, 2014-06-30 Suffolk's Defended Shore presents an illustrated history of the development of military defences on the Suffolk coast using data collected as part of the English Heritage national survey The survey involved the examination of both modern and historic aerial photographs which led to the creation of a detailed map of the archaeological remains on the county's coast The results of the survey are dominated by evidence for the military defence of the coast reflecting the importance of the Suffolk coast in national defence strategies over many years Extensively illustrated this book highlights the particular importance of historic aerial photographs which provide a different and unique perspective on the coastal defences constructed in World War II Photographs taken during and immediately after this war sometimes provide the only visual record of the rapidly evolving defences from this period **UK Airfields Past and Present** Grant Peerless, 2020-10-04 A

great many books have been written over the years about individual airfields or those in particular counties areas but this one covers a good proportion of them in one publication from Abbots Bromley to Zeals It provides brief details of over 1700 airfields from before the First World War to the present day and describes the main activities carried out based units operators and current status It includes military bases civil airports airfields gliding sites microlight sites and larger farm strips together with the probable number of based aircraft An appendix lists over 500 books which have been published about individual airfields and this together with the details provided in this book affords a convenient source of reference for further research It does not pretend to include every flying site that ever existed as this would require a much larger volume but covers what are considered to be the most significant airfields of the past 110 years It includes over one hundred photographs in colour and black white most of which have not been published previously In the Hands of Strangers Kim Moretto Niemeier, 2016-11-07 On June 12 1944 six days after the D Day invasion of Normandy U S fighter pilot Fred Moretto

Martin, 1999 *Got Any Gum Chum?* Helen D Millgate, 2009-04-30 When the first American servicemen arrived in England in March 1942 the indigenous population greeted their presence with mixed feelings A certain level of resentment of these newcomers was harboured by the English and expressed by many in the in the well worn phrase of the time over paid over sexed and over here But without the presence of American servicemen in Britain and its huge military and industrial muscle the war with Germany would probably have been lost Using a combination of contemporary eyewitness and documentary sources plus latter day interviews linked together by engaging narrative Helen Millgate takes a look at the background to the friendly invasion where they all came from who they were where they were stationed and what they did She examines how the Yanks got on with the locals how they fitted in or didn't their impact on the social structure of England in the 1940s the problems they brought with them and their impressions of England She concludes with the journey home once the war in Europe had ended describing what the Yanks left behind them and the wives and sweethearts they took stateside **100 Group (Bomber Support)** Martin W. Men at War Luke Turner, 2023-04-27 As the Second World War moves beyond living memory and its last veterans leave us we are in danger of losing our opportunity to understand the reality behind the conflict's myths machines and iconography From filmmakers writers artists and ordinary people including his own family members Luke Turner assembles a broad cast of characters to bring this much mythologised conflict to life There are conscientious objectors a bisexual Commando a transgender RAF pilot and those who simply did what they could to survive and return home to a complicated peace By exploring a wartime experience that embraces sex lust and the body as much as tactics and weaponry Turner argues that the only way we can really understand the Second World War is to get to grips with the complexity of the lives and identities of those who fought and endured it

The Battle of the Fields Brian Short, 2014 This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside and its past and to those who continue to share a fascination for the Second World War in particular the home front The Battle of the Fields tells the story of rural community and authority in Britain during the Second World War by looking at the County War Agricultural Executive Committees From 1939 they were imbued with powers to transform British farming to combat the loss of food imports caused by German naval activity and initial European mainland successes Their powers were sweeping and draconian When fully exercised against recalcitrant farmers dispossession in part or whole could and did result This book includes the most detailed analysis of these dispossessions including the tragic case of Ray Walden the Hampshire farmer who was killed by police after refusing to leave his farmhouse in 1940 The committees were deemed successful by Whitehall as harbingers of modernity mechanization draining artificial fertilizers reclamation of heaths marshes and woodlands We now deplore some of these changes but Britain did not starve in large part thanks to their efforts This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside

and its past and to those who continue to share a fascination for the Second World War in particular the home front It will also demonstrate to all who are anxious about food security in the modern age how this question was dealt with 70 years ago BRIAN SHORT is Emeritus Professor of Historical Geography at the University of Sussex and formerly Dean of School and Head of the Department of Geography
